

**3 FLORA & FAUNA**  
Research flora and fauna within the riparian and aquatic environment and summarise findings

**4 WETLAND THREATS**  
Learn about the threats to wetland habitats. Students will research a threat and mitigation strategies.

**2 ABIOTIC VS BIOTIC FACTORS**  
Define and identify abiotic and biotic factors in a wetland environment

**5 FRESHWATER TURTLES**  
Learn about freshwater turtles, their morphology, habitat preferences and their ecological role.

**1 WETLAND HABITATS**  
Learn about wetland habitats and the function of the riparian zone.

**7 WETLAND OBSERVATIONS**  
Visit your local wetland and collect data on turtle habitats, the distribution of flora and assess the health of the wetland.

**6 CULTURAL SIGNIFICANCE OF TURTLES**  
Learn about the cultural significance of freshwater turtles to First Nations People

**TERM 1**
