

Term 1, Lesson 2

Abiotic & Biotic Factors

Learning Objectives:

1. Define and identify abiotic and biotic factors within the wetland environment.

What are abiotic and biotic factors?

Abiotic factors - non-living components of an ecosystem. Examples include light, air, soil, temperature, water.

Biotic factors - living components of an ecosystem. Examples include fungi, bacteria, plants, animals.

Classroom Activities

Activity 1 - Identify abiotic and biotic factors

Classroom Activities

Activity 2 - Worksheet.

Identify abiotic and biotic factors in the wetland environment.

Classroom Activities

Activity 2 - Worksheet.

Write a paragraph about the wetland environment in the worksheet. Identify the abiotic (A) and biotic (B) factors in your sentences.
