SYNAPP
DELIVERING NEXT-GEN CYBER SOLUTIONS

NASA SEWP VI
Solutions for Enterprise-Wide Procurement

ABOUT SYNAPP

SYNAPP Incorporated is an SBA Certified Service-Disabled Veteran Owned Small Business (SDVOSB). We offer cyber security and SETA services focused on nationwide Department of Defense, National Aeronautics and Space Administration, DoD contractors, and other United States government solutions.

CORE COMPETENCIES

IT Services & System Compliance

- IT Program Management
- Strategy & System Transformation
- Enterprise & Mission System Architecture
- Cyber Security Policies, Plans & Procedures
- Authorization Packages
- Continuous Monitoring/FISMA Reporting

DEVSECOPS

- Application Development
- Software Code Review
- Application Testing
- Vulnerability Mitigations
- UI Design
- Lifecycle Management

CYBER VULNERABILITY & RISK MITIGATIONS

- Penetration Testing & Vulnerability Mitigation
- Risk Management Framework
- Vulnerability Management
- Risk & Threat Assessments
- System Analytics & Configuration Management
- Cyber Security Solutions with Results in Mind

WHAT DOES SYNAPP MEAN?

SYNAPP represents a unique convergence of technology and biology, encapsulating the essence of connectivity and security in the digital realm, much like a synapse does in the human brain. At its core, it embodies the process of initiating and authenticating connections, symbolized by the SYN/SYN-ACK/ACK handshake in networking, while also functioning as an application designed to perform critical operations.

This innovative approach allows SYNAPP to serve as a digital synapse, bridging gaps between disparate pieces of information, thus facilitating seamless communication and integration. By mimicking the biological function of synapses, which are crucial for neuronal communication and information processing, SYNAPP aims to enhance the security and efficiency of digital ecosystems. Its role in connecting essential information mirrors the synaptic function, ensuring that data flows smoothly and securely, thereby minimizing risks, vulnerabilities, and threats in an increasingly interconnected world.

Category C Contract: 80TECH26D1822
PoP: 11/2026 – 10/2036
UEI: CQNKQUJ7P736
CAGE Code: 8E8M7
Website: synapp.com
POC: Christopher Rodgers
c.rodgers-sewp@synapp.com

Address: 1020 Wading Waters Circle
Winter Park, Florida

ABOUT SEWP VI

Pronounced "soup", NASA's Solutions for Enterprise-Wide Procurement (SEWP VI) Government-Wide Acquisition Contract (GWAC) provides the latest Information Technology Communication and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors.

The SEWP vehicle represents acquisition innovation within the Federal Government. Created in 1993, SEWP I was the first GWAC and initially provided only technology products; over the past 30 years, SEWP has continually evolved, expanding its scope to meet the requests of its customers.

The program is self-funded through usage fees and provides all Federal Agencies with acquisition support.

How to Contact SEWP

SEWP PMO Hours:	Mon-Fri, 7:30 AM – 6:00 PM (ET)
Email:	help@sewp.nasa.gov
Customer Help Desk:	301-286-1478
Website:	www.sewp.nasa.gov

What's in Scope for SEWP VI?

SEWP is designed to provide a broad suite of ITC/AV solutions and services. Technology is ever evolving and for that reason SEWP's processes enable Contract Holders to add new commercial technology and IT services to their contract daily, as requested by customers. The focus of SEWP is on the full suite of technology offerings that simplify Governmental access and Industry offerings across the entire ITC/AV solutions and services landscape.

If you would like SEWP to determine if your requirement is within scope of the SEWP VI contract, please send an overview and/or bill of materials (BOM) to help@sewp.nasa.gov and SEWP will quickly review and provide feedback.

The SEWP Contracts were awarded by scope category:

- Category A — ITC/AV Solutions
- Category B — Enterprise-Wide ITC/AV Service Solutions
- Category C — Mission-Based ITC/AV Service Solutions

Fair Opportunity

FAR 16.505(b) (1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding $10,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the Contracting Officer (CO) and that the CO must document the rationale for placement and price of each order.

Using the SEWP online Quote Request Tool (QRT) is the recommended method to assist in this activity and to augment the required decision documentation. The SEWP QRT will automatically include the Contract Holders within a selected Category or based on a suggested source.

Ordering Process

The internal ordering process of each Agency varies. The process and accompanying forms for Purchase Requests (PR) and Delivery Orders (DO) that are issued against a SEWP contract are defined by the issuing Agency, not the NASA SEWP Program Management Office (PMO).

The typical process is for an end-user to determine a requirement and generate a PR. The PR, along with any necessary funding information, is sent to that Agency's procurement office, which results in the issuance of a DO.

Any valid Federal Agency DO form and the associated DO number may be used.

The NASA SEWP PMO does not issue DOs; these must be issued through the issuing Agency's procurement office. The SEWP PMO reviews, processes and tracks issued DOs and forwards them to the Contract Holder(s).

Some Agencies have special requirements for issuing IT DOs. It is the Issuing Agency's Contracting Officers' (COs/KOs) responsibility to be aware of any Agency-specific policies regarding issuing orders via an existing contract vehicle and GWACs. There are no requirements under the SEWP Contracts for issuing Agencies to use other intermediary procurement offices, except as directed through their own internal policies.

If modifications are made to any order, these modifications must also route through the SEWP PMO.
