

BlessMyBitcoin White Paper

Preserving Bitcoin Legacies with Privacy, Security, and Simplicity

Executive Summary

BlessMyBitcoin.com is a privacy-first, non-custodial platform for Bitcoin legacy planning. We help Bitcoin holders securely protect and pass on their digital assets with peace of mind, using safe, user-friendly tools.

Introduction

Bitcoin is more than money—it represents long-term value and responsibility. Without proper legacy planning, digital wealth can be lost forever. BlessMyBitcoin provides tools that make inheritance and gifting safe and simple, while never compromising your security.

Core Principles

We prioritize privacy, clarity, and purposeful simplicity. Users retain full control of their Bitcoin, with no private keys ever requested or stored by our platform.

Plan a Seed

Plan a Seed lets users securely store their Bitcoin recovery phrase offline and set an alert for their beneficiary. A personal tip helps beneficiaries locate the stored seed without revealing the exact location online. This ensures long-term safety and inheritance without compromising security.

Plan a Gift

Plan a Gift allows scheduled Bitcoin transfers to beneficiaries. Users can set alerts, provide personal tips, and even gift Bitcoin to recipients who may not yet have a wallet. This tool balances accessibility and privacy, making Bitcoin gifting simple, secure, and reliable.

Trust & Security

- **SSL Encrypted:** All data exchanges are protected.
 - **GDPR Compliant:** Minimal data collection, never sold or shared.
 - **Independent Security Checks:** Regular scans for malware and vulnerabilities.
 - **Non-Custodial:** Users retain full control of their keys at all times.
-

Community & Transparency

BlessMyBitcoin is community-driven, education-focused, and transparent. We provide guidance for new Bitcoin users and long-term holders alike, fostering trust and responsible digital asset management.

FAQ Highlights

Q: Is Bitcoin legacy planning only for older people?

A: No, anyone with Bitcoin should plan ahead to ensure their assets are preserved.

Q: How does BlessMyBitcoin work?

A: Users create a Seed or Gift plan, set alerts, and leave personal tips for beneficiaries without ever exposing private keys.

Terms & Conditions

BlessMyBitcoin operates under a privacy-first, non-custodial model. We never request or store private keys and only collect minimal data for alerts and functional purposes.

Conclusion

BlessMyBitcoin provides a secure, simple, and transparent platform for Bitcoin legacy planning. Our tools ensure your digital wealth is protected and can be passed on safely, preserving your legacy for future generations.
