

MISSION

Our mission is to provide support and hope to individuals and families who are living with severe and permanent brain injury.

PURPOSE

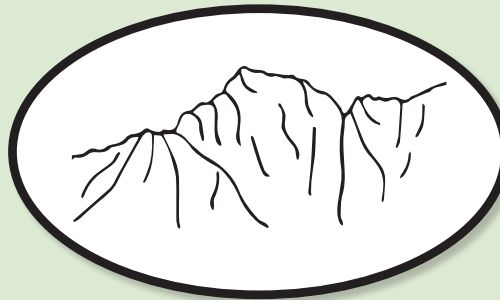

Provide an environment and social interactions that enrich the lives of individuals with severe brain injury.

The Granite House residence gives families an alternative to traditional long-term care or care at home.

Granite House offers a support network for families and advocates for people who cannot speak for themselves.

Granite House is proud to have a strong connection to our community. Gifts of labor, materials, and donations from our contractors and neighbors helped to build this special place for our residents, their families, and our staff. We opened our doors in 2018 to families and continue to benefit as a nonprofit with donor-supported programs and volunteers.

Granite House is a licensed provider for the Minnesota Department of Human Services. Residents receive benefits from waivers, either the Community Access for Disability Inclusion (CADI) or the Developmental Disability (DD) waiver. These programs are designed to allow people who require nursing-level care to live in the community rather than in an institution.

Severe Brain Injury Long-Term Care and Family Support

A place for families to heal

Enriching the quality
of life for individuals with
severe brain injury

www.granitehousemn.org

ADVOCACY

Reality: younger adults who survive severe brain injuries have few choices for long-term care if families cannot care for them in their home.

- There is a lack of available housing
- Traditional long-term care may not meet the needs of those with brain injury
- Full care can be difficult for families
- Families need to heal, receive support and spend time with their loved one

ADMISSIONS CRITERIA

- Age 18 to 54 at admission
- Severe and permanent brain injury
- Medically stable, not requiring 24 hr RN
- Admissions process may begin as early as six months post-injury

PROGRAM LIMITATIONS

Granite House is not a rehabilitation facility but provides passive range of motion and weight-bearing therapy. We do not provide 24-hour Registered Nurse care.

24-HOUR COMPASSIONATE CARE

Granite House is a 4-bed community residence, a real home for the long-term care of people whose recovery after brain injury has plateaued at a low level of consciousness. Our residents are medically stable, needing full care due to a traumatic or acquired brain injury.

LOCATION

Granite House is located near Stillwater, Minnesota, convenient to services in the Twin Cities metro area. Massive oaks and maples surround the house, providing a peaceful and beautiful setting.

DONATE

Your gift will help us to maintain programs at Granite House and offer sustainable support for our residents, their families, and the wider community of people affected by brain injury. Checks can be mailed directly to Granite House, and secure online gifts can be made from our website.

Granite House, Inc. is a Minnesota non-profit organization and tax-exempt as a Federal 501(c)(3).

PURPOSE-BUILT FEATURES

- Open floor plan for wheelchair access
- Great room and family gathering areas
