

WINTER HOME MAINTENANCE

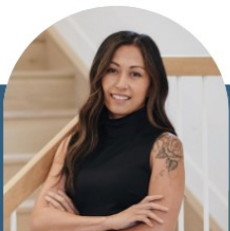

Checklist

INDOOR

- Test smoke and carbon monoxide detectors
- Check that your furnace is working well and replace the filter regularly
- Keep a space heater and extra blankets on hand just in case
- Watch for signs of frozen pipes—leave cabinets open under sinks when it's really cold
- Make sure windows and doors are sealed to keep the warm air in
- Stock up on essentials in case of bad weather (batteries, water, snacks, flashlights)

OUTDOOR

- Keep walkways, driveways, and steps clear of snow and ice
- Use salt or sand to prevent slipping
- Check your roof and gutters for ice buildup
- Protect outdoor faucets with covers
- Watch for hanging icicles and remove them safely if needed
- If you have a generator, make sure it's ready and fueled
