

June 12, 2020

Jason Rego and his team at Rego Salvage Inc. are amongst the most reliable, reasonably-priced and professional companies I have dealt with for my hoisting, storage and salvage needs.

I recently completed two projects for national clients in the Ottawa area that involved the receipt, storage, delivery, rigging and hoisting of over one hundred pieces of roof top equipment.

Jason and his team made doing these jobs easy and efficient. They delivered all work on time and on budget and were always honest and direct in their communication.

They are also great problem solvers and team players. On a couple of our more complicated sites Jason and his team helped us coordinate tough schedules with tight physical constraints. These guys do not look for the easy way out they look for the most efficient, safest and fiscally responsible solutions.

I cannot say enough about this firm and can confirm that they will always be a part of my construction teams going forward.
