

## OUR STORY

In 2015 I was diagnosed with osteoporosis. Treatment protocol consisted of drugs to help build bone density. I was afraid of the drugs. Having suffered an earlier horseback fall as a teenager, I had been on long term steroid use, spent a year in a wheelchair, had back surgery, and was lucky to have walked again. At that time, doctors were unaware steroids could predispose you to osteoporosis - loss of bone density, and risk of bone fracture and breaks.

In my 2015 osteoporosis diagnostic appointment with my endocrinologist, I was told I was at risk of spontaneous bone fractures, and/or breaks. He wanted me on drugs. I respected his opinion. But I did not want to go on the drugs. I began researching ways to protect my bones, without the pharmaceuticals, and their risk of dangerous side effects.

In my research, I discovered a collagen research company located in Germany that had studied and documented a specific patented collagen type and processing that resulted in a documented increase in bone density. I contacted the company, and went on the collagen.

Two years later, in 2020, I was thrown from my 17.2 hand horse. I remember thinking "God help me fall!" as I was violently hurled through the air. When I landed on the ground I wondered whether I would walk again. Amazingly to myself, the attending emergency physician, and my endocrinologist, I did not suffer a break, or a fracture. My bones were intact.

Five months later I had a bone density scan, and learned that my bone density increased 9%. That 9% bone density increase, attributed to PURE Collagen Organics®, is why I was able to walk away from my horseback riding accident. In September 2023, I had a 2nd new bone scan, and learned my bone density increased another 11%. My spine, with a total 20% increase in bone density since beginning the PURE Collagen Organics® product in 2019, is now classified as "healthy normal."

Throughout this amazing discovery of a pure collagen that delivered life changing results, I decided to share - to start a new company here in the United States offering the patented FORTIBONE® collagen for Bones, FORTIGEL® collagen for Joints, and VERISOL® collagen for skin, soft tissue and hair.

Not all collagens are created equal. PURE Collagen Organics® is different in our vision of using specific researched, patented and proven collagens processed in a precise way, to achieve a targeted response in your body.

Our FORTIBONE® bone formula is very different than our FORTIGEL® joint, or VERISOL® skin formulas. We custom blend a formula that is tailored to your concerns, and your body - for a personalized and optimized collagen support that reflects your body's unique collagen needs.

Now, the friends, family and clients with whom I have shared PURE Collagen Organics® - are sharing their stories. Stories of stronger bones, increased joint comfort, less pain, greater mobility, better healing, more beautiful hair and skin, enhanced mood, digestion, and immunity.

Our commitment is to health, and sustainability. Our packaging is glass. We add no fillers, additives, or other ingredients. We support our canine and equine friends in distress. They, too, greatly benefit from collagen support.

We hope your journey with us will make your life healthier, and happier. Welcome to PURE Collagen Organics®.
