

SAFFLOWER SEED

- Safflower Seeds – a versatile and nutritious choice for discerning bird enthusiasts. Specially curated for their high-quality.
- High in protein and oil content, safflower seeds attract a variety of species.
- They act as a natural deterrent, and the bitter flavour of this seed keeps squirrels, European Starlings, Red-winged Blackbirds, and Common Grackles at bay from your feeders.

Northern Cardinals, House Finches, Chickadees, Mourning Doves, Nuthatches, Rose-breasted Grosbeaks, and Tufted Titmice

For better results opt for tube and hopper feeders.
