

## How to prepare for your gutter cleaning or gutter inspection

Thank you for trusting us to take care of your gutter cleaning needs.

We aim to provide you with the best customer service available anywhere and meet or exceed your expectations.

To make your experience with our company hassle-free and the project go smoothly. We have created this checklist of things you'll need to do before we arrive at your home.

- Please take the time to physically check your outside water spigots and ensure they are on and fully operational. We will require water if we are cleaning the outside of your gutters, and we may need water to aid with cleaning the inside of your gutters.
- Please check your exterior power outlets and ensure they are operational. Without power, we cannot clean.
- Remove any exterior decoration that will hinder us from moving freely around your home's exterior.
- Close all windows, storm windows, and doors.
- All gates must be unlocked on all projects so we can access your entire property.
- Do not have any other contractors working on the exterior of your house or property the day we are there. We must have free movement around your property to complete your project.
- Keep all your pets inside and, most importantly, remove all pet waste and water bowls from your yard.
- If you intend to plant flowers, put in mulch, seal your driveway, clean your windows, or do exterior painting, it is best to do it after we are done, not before.
- Do not enter or exit your home while we work on it. You will compromise the safety of the project.
- The scope of work is defined by the estimate you agreed to. Please call our office, and we will provide you with a price for any extra work you would like done.
- Enhance Power Washing, Inc. expects your property to be in good repair and weathertight. This includes but is not limited to all doors, windows, and electrical services, including receptacles and light fixtures. Enhance Power Washing, Inc. is not responsible for damages due to water infiltration, improper installation, maintenance, or repair of electrical-related items or at doors or windows.
- Unless other arrangements have been made in advance, all payments are due upon completion of the project.

If you have any questions, please call us at 678-713-1137, and we'll be glad to help you.
