

ZeeU NotifyMe

LET YOUR ERP NOTIFY YOU

Jeeves has a brilliant search functionality. And many customers use this to find abnormalities. But often this is done too late and no time to fix it.

But what if you could have the result mailed to you?

In time?

And exactly the information you want to be included?

ZeeU have developed a framework to notify you based on preselected searches. You can maintain this by yourself - and have full control of the different notifications. All from a new program in Jeeves.

NotifyMe also notifies you based on updates in Jeeves standard log program. And a new program is also included to add Supplier agreements with end-date.

Notifications can be:

- Security related (e.g change of bank account)
- Controlling (e.g items without cost)
- Information (e.g sales with low margin)
- Agreement (e.g supplier agreements or customer agreements)

There will be 5 standard searches included - to get you started.

You define how often and who should have the mail.

It's time to let Jeeves do the Job.
