

LETTERS FROM THE SUN

Formerly known as InElements. Letters From The Sun is comprised of four hard working musicians through out the Colorado area. When Huk (Vocals) Matt (Guitars), and Ryan (Drums) wanted to keep going and continue the live domination. They recruited Ghost Radio bass player and original Inelement's pioneer Dre back into the group. Ryan would later step down after only one show and the band would recruit Brandun (Beauty in The Suffering) to take over. Together the group writes a dark but beautiful form of nu metal. Huk contributes a clean and charismatic vocal but also destroys ones ears with a brutal but very soothing scream with a rhythm section that syncs right in with the sound.

The band members have lots of experience regionally and locally. They have shared the stage with several well known national artists including In This Moment, 10 years, StarSet, Noting More, Gemini Syndrome, Hed Pe, Sick Puppies, Trapt, and many more. They have even done a few two week runs as support for the national Artist 10 Years.

Letters From The Sun has a goal to reach everyone throughout Colorado and beyond. Whether its playing for 2 to 3 people or 2 to 3,000 people. Their energy alone and common interest in performing will leave you wanting to come back for more.
