FIEDLER BEATE TAMARA

Chief Security Officer

Adeya was introduced to us for secure communication between specific people. The implementation was quick, and the support is excellent. We are very satisfied with the service and its functions and can only recommend Adeya to others.

MICHAEL HADDAD

Chief Executive Officer

Adeya Multi-layered approach, military-grade cryptography and Peer to Peer Authentication is the most secure method to deliver sensitive communication for healthcare professionals and to protect patientsdata.

ASH MENON

Chief Executive Officer

Adeya is the ideal solution to protect corporate information highly reliable and robust for the Finance industry. I would recommend the solution for similar organizations.

DENIS DE CARVALHO LEAL

Chief Operation Officer

Adeya has helped me to improve productivity and easily share confidential information with the rest of our team in a secure way. Recent data breaches from those underline the importance to adopt security by design solutions. Quality is far superior without compromising usability.

Secure Communications Staying Private

Military-grade encrypted real-time one-to-one, group and video calls, SMS and team instant messaging.

Private Contacts
Keeps your contact list private and independent from the device's directory and synced centrally.

Secure Messaging
Encrypted SMS instant messaging. Secure broadcast and group chat.

Voice And Video Calls
Individual and conference calls encrypted with excellent voice quality. PBX integration supported.

Live Location Sharing
Confidential real-time location sharing limited on time with individual or group chat.

Compliant Secure Collaboration

Organization productivity with multi-screen video conferencing, workflows assignment with remote staff and partners.

Multi Screen Application
Responsive application design that will adapt to each screen type assures the best user experience.

Multi User Conference
Trigger online meetings over video, multi-site training or remote technical support.

Guest Invitation
Secure guest rooms for external parties. Project collaboration and group chat.

Screen Sharing
Collaborate sharing screens securely, presenting documents without eyedrop or print screen.

Secure Container Protecting Your Documents

Safeguard and share sensitive documents, from a dedicated encrypted container accessible from any device and synced.

Secure File Management
All your files, images, videos and any data are stored securely on your secure container.

Secure File Hosting
Benefits, from military-grade end-to-end encryptions isolated from your devices.
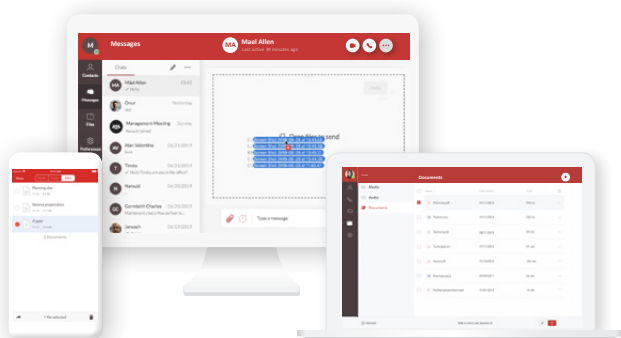

Secure File Sharing
Efficient file sharing that exchanges, stores, and manages your corporate files.

Protected Notes
Take plain-text notes within the app itself and secure them in the File Container.

Meeting Business Connections Data Privacy

Keep IT enterprise in the driver's seat of policies and controls with the central management console.

Connections Management
Manage organization identities and allocate right via a user-friendly and highly secure web application.

Workflows Integration
Connect daily workflows to your core ERP or CRM systems that will bring agility to your organization.

Dashboard
Track and create output activity reports for community members through the dashboard.

Information Broadcast
Broadcast information and implement company policies instantly increases employee engagement.
