

Certificate of Attendance

TÜV SÜD America Inc. hereby certifies

Jherrod Thomas

has attended the TÜV SÜD training course

ISO/PAS 21448 Advanced Training, Technical aspects to achieve the safety of the intended function (SOTIF)

on 05 August 2022 in Online

The course covered the following:

Analysis and evaluation of risk imposed by the intended function Identification and provisions regarding triggering events during system development. Ways to evaluate misuse and adequate precautions. Specification of the intended function and evaluation of functional architectures. Validation strategies to support the argumentation towards SOTIF. Discussion of issues regarding derivation of validations targets. Approaches to argue the achievement of overall risk targets. Relation and combination of the SOTIF (ISO/PAS 21448) and functional safety (ISO 26262)
