

A Global Council for US-APAC Business Clarity

The global trading system is showing acute signs of weariness—fatigued by shock tariffs, policy whiplash, and a rising “wait-and-see” paralysis gripping boardrooms and governments alike. The Trump Administration’s abrupt decisions, followed by pauses, has deepened uncertainty and stalled decision-making across markets.

About Us

Investors and leaders face a radically reshaped global risk landscape. From trade policy shocks and energy infrastructure vulnerabilities in the U.S. to China’s strategic assertiveness in clean energy, AI, and supply chain dominance, capital allocation demands sharper clarity on geopolitical, technological, and macroeconomic signals. We equip stakeholders with intelligence to navigate these transitions—and invest with conviction.

We Provide Clarity:

Geostrategic Insight:

Decode complex market signals and global trends for investors and boardrooms with deep industry expertise

Clarity Amid Volatility:

Help Investors, venture funds and businesses, and their Boards make grounded capital allocation and governance decisions.

Cross-Border Investment Foresight:

Mitigate risk and unlock value in the world’s most consequential growth regions.

Multi-Market & Discipline Expertise:

Combine on-the-ground understanding across the U.S., China, and other Asia Pacific nations in critical sectors.

CLARITAS is brought to you by dynamic, globally based leaders. In a world clouded by tariffs, wars, and political theater, they are united by a clear mission: to help businesses and institutions see through the fog—so they can act boldly in the real, new global economy.

We Focus On

Geopolitical Policy Risks

Unpacking how China’s rise is reshaping U.S. policy and the broader Asia-Pacific economies.

Global Capital Flows

Navigating financial opportunities and derisking investment portfolios in the shifting global economy.

Energy & Sustainability

Understanding the intersection of energy security, policy, and sustainable innovation.

Strategic & Security Tech:

Picking opportunities for national resilience in critical technologies such as AI, quantum computing, semiconductors, and robotics, while managing geopolitical risks from U.S.–China competition.
