

**EXPOSED FASTENER PANELS
COLOR CHART**

PAINTED FINISH OPTIONS

Signature® 200 coating is a silicone modified polyester (SMP) paint system that combines excellent physical characteristics and aesthetics for metal roofs and walls. Signature 200 coatings are formulated for hardness and flexibility, making them a versatile and durable finish for a variety of applications.

Signature® 300 coatings utilize a polyvinylidene fluoride (PVDF) resin for lasting color retention and resistance to chalking. Ideal for high visibility architectural and industrial applications, these premium color options offer superior formability and color consistency to ensure your building looks beautiful for decades with simple cleaning and maintenance.

AVAILABLE ACCESSORIES

- Hat and Channel Sections
- Light Transmitting Panels
