

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER SERVICE LINES

Este informe contiene información muy importante sobre su agua potable.
Tradúzcalo o hable con alguien que lo entienda bien.

As required by U.S. EPA, CA190045 has identified that your water service connection is considered a lead status unknown service line.

The Reesedale Mutual Water Company recently conducted an inventory of all water service lines, which is the pipe that connects your dwelling to the water main. The purpose of the inventory is to identify the material of these service lines and fittings, including the customer-owned side of the water service line.

The pipe that connects your dwelling to the water main was identified as an unknown material. Lead service lines or certain galvanized pipe can potentially place you at risk for exposure to lead. Therefore, your service line material will need to be identified.

The Reesedale Mutual Water Company routinely monitors for contaminants in the distribution system every month to monitor and maintain safe distribution conditions.

Is my water affected?

*** If you received a separate notice instructing you to not drink, boil, or avoid drinking your water, then please continue following those instructions until you are instructed to do otherwise.**

If you **did not** receive any separate notice:

- This is not an emergency.
- Your water is safe to drink and meets federal and state safe drinking water standards.
- You do not need to use an alternative water supply (e.g., bottled water).

What about my service line?

- Because your service line is categorized as a lead status unknown composition, you can help your public water system identify your service line material.
 - EPA has developed an online step-by-step guide to help people identify lead pipes in their homes called Protect Your Tap: A Quick Check for Lead. (<https://www.epa.gov/ground-water-and-drinking-water/protect-your-tap-quick-check-lead>)
 - Other organizations have also provided tools to identify service line material, such as the LSLR Collaborative (<https://www.lslr-collaborative.org/identifying-service-line-material.html>)
- Inform us immediately if you plan to alter or replace your service line because we may be required to replace the system portion.
- Please contact us immediately if you feel that we have incorrectly categorized the service line material.

Contact Reesedale Mutual Water at (661) 877-8079 or reesedalemutualwater@gmail.com to inform us if your service line has been incorrectly categorized to share any information you may find about your service line, or to inform us of your plans to alter or replace your service line.

What happens next?

Construction will commence this year where all service lines will be visible for inspection. We anticipate identifying your service line by the end of 2026.

Lead Related Health Information

- *Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can cause new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.*
- If you have concerns about your water quality, the State Water Board's Environmental Laboratory Accreditation Program has a [map of laboratories](https://www.waterboards.ca.gov/drinking_water/certlic/labs/) that can test your water at the consumer's expense, which can be found at: https://www.waterboards.ca.gov/drinking_water/certlic/labs/
- If you still have health concerns from potential lead exposure in your drinking water, there are point-of-use (POU) devices that can be used on your drinking water taps to provide an additional barrier of protection. A list of these residential treatment devices can be found at: https://www.waterboards.ca.gov/drinking_water/certlic/device/watertreatmentdevices.html
- If you have other health issues concerning the consumption of this water, you may wish to consult your health care provider.

Additional Resources

To verify the material of an unknown service line, for information on financial programs to assist with service line replacements or for any other information, an officer at (661) 877-8079 or reesedalemutualwater@gmail.com and/or visit reesedalemutualwater.com

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.
