

How it Works

1 Select Your Design

2 Decide what size kit you want. Remember kits for two or more include **FREE** shipping.

3 Place your order. You will generally receive your kit in 3-5 days, but allow some extra time due to current delays throughout the nation. Check your order confirmation for information on accessing our on-line video instruction.

4 Once you are ready to paint, select the device you will be using. Make sure your glass is clean and dry, and start your video. Remember, there is no rush, so go at whatever pace you are comfortable with. The videos are 20-45 minutes with prompts letting you know when to pause.

6 Be sure to send us pictures and give us your feedback!

5 Cure the paint to your glass based on the instructions in your box and on your video.

- Cheers to our new "Grazers"!
