

TECHNICAL DINNER MEETING: 15 MAY 2018

SoCAL CHAPTER

Introduction to Chemical Grouting

Presented by

Jack Whitworth – Aquafin, Inc.

The So Cal Chapter of RCI, Inc. invites you to learn, network and dine at our Technical Dinner Meeting at **Old Crow Smokehouse Orange, 1535 West Katella Ave, Orange, CA 92867**. This program is designed to improve the knowledge base of consultants, contractors, and design professionals practicing in the roofing, waterproofing and building enclosure field. The seminar provides 1.0 AIA LU's and 1.0 RCI CEH's and includes dinner.

Chemical grouts are an effective means for stopping water infiltration through concrete and brick substrates. Ensuring successful waterproofing applications utilizing chemical grouts involves numerous factors such as proper material selection and in-depth understanding of the different grouting approaches. This presentation focuses on different grout types available, typical applications and understanding other influencing factors that affect proper grout selection. It also presents proper means and methods to follow when injecting chemical grouts, as well as highlighting important safety considerations.

The objectives of the presentation are:

1. Identify the different types of chemical grouts.
2. Understand how chemical grouts can be used to effectively stop water migration through concrete and brick structures.
3. Review important safety practices when using chemical grouts.
4. Identify common applications for chemical grouts.

Jack Whitworth [jwhitworth@aquafin.net] is Technical Product Specialist of Aquafin Inc's chemical grouting division. He has over 28 years of technical and hands-on field experience in the construction industry focused on mitigating water leakage through concrete structures. Jack has been involved in crack injection and leak repairs on many notable local projects including the BART Powell Station, Transbay Tower, Baker Berry Tunnel and Ballpark Village.
