

**CALL FOR PRESENTATION ABSTRACTS
22nd ANNUAL IIBEC SOCAL CHAPTER
HAWAII WINTER WORKSHOP**

**Riding the Waves:
Navigating Industry Transformations**

**January 26-27th, 2023
Aulani, A Disney Resort & Spa
92-1185 Ali'inui Drive
Kapolei, HI 96707**

The IIBEC So Cal Chapter (formerly the So Cal Chapter of RCI, Inc.) is seeking abstracts for presentations at the 22nd Annual Hawaii Winter Workshop.

The building design and construction industry is in the midst of a rapid and disruptive transformation. Recent emerging technologies, world events, regulation changes, and shifting labor trends continue to affect the way the built environment is designed, constructed, maintained and repurposed. On-going global supply chain issues and workforce availability constraints have challenged us to rethink how we can effectively meet fundamental enclosure performance requirements - air-, and water-tightness, vapor control, thermal efficiency and fire resistance, while meeting the collective expectations of all project stakeholders.

The upcoming 2023 workshop will focus on navigating dynamic changes in the building envelope industry. The primary workshop goal will be to provide attendees with valuable insight into contemporary trends within building enclosure design, consulting, manufacturing, and construction.

Professionals from the roofing/waterproofing consulting, architecture, engineering, manufacturing and construction community are invited to submit abstracts for presentations. Submitted abstracts should pertain to modern developments in building enclosure design and construction, including but not limited to the following:

- Roofing, horizontal or below-grade waterproofing, air barriers, fenestration systems, exterior cladding
- Industry trends or hot topics
- Emerging technologies, construction methods and building materials
- Advances in investigation and testing techniques
- Building sustainability and resiliency
- Constructability

The deadline for submitting presentation proposals for consideration is Thursday September 22, 2022. Proposals should be submitted as a 250-word (maximum) abstract.

Any questions about presentation submissions should be sent to hawaii2023@socalibec.org.

The Hawaii Winter Workshop is a two-day educational program offering current information regarding design, construction, maintenance, and repair of roofing, waterproofing, and exterior walls. The program is designed to bring together professionals from the industry to discuss building enclosure design, including roofing, waterproofing, walls, and building science. IIBEC So Cal Chapter is an AIA- and IIBEC-approved education provider. Attendees will receive up to 12.5 learning unit hours or CEHs.

Exhibitor tabletop display and program sponsorship opportunities are available. Please e-mail hawaii2023@socalibec.org for information.
