WORKING WITH CHILDREN AND  
SPECIALIZING IN CHILDREN WITH  
ASD/SENSORY PROCESSING  
DIFFICULTIES

# WOULD YOUR CHILD BENEFIT FROM

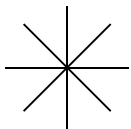

## PLAY/DEVELOPMENTAL THERAPY?

Benefits of developmental therapy include:

- increased joint attention : eye contact, give/take, reciprocal play
- increase in functional communication vs. grabbing, grunting/tantruming
- increase in executive functioning skills including impulse control, patience, turn taking and self-regulatory skills
- decrease in sensory seeking behaviors to increase attention

All through fun learning and sensory based play!
