\$5.7M

Savings to
Uncompensated
Care

HealthQuest's mission is to assist those who cannot afford their prescriptions through free pharmacy and agency services. Our vision is a healthier community where everyone has access to affordable medications. Programming is person-centered and collaborative, ensuring everyone is treated with compassion, dignity, and respect as we reduce barriers to pharmaceutical care.

By focusing on chronic disease management, we help our clients to maintain their health, avoid costly emergency care, and improve their overall quality of life. Our services ensure that the most vulnerable members of our community receive the medications and support they need to lead healthier lives.
