# Italian experience, design and know-how

It is a proven fact that Italian design has conquered the world. Masters in all kind of design industries, Italian style creates what others can only dream. According to these roots and with the production facility in Verona, Itaka Stone follows the Italian tradition in manufacturing stone, to launch innovative surfaces for distinct, aesthetic, excellent and glamorous interiors, **as only Italian design can do.**

Highly appreciated worldwide, this made-in-Italy firm is a style statement: finest quality Italian compositions, combining sublime natural quartz with the elegance and boldness of a truly impeccable design.

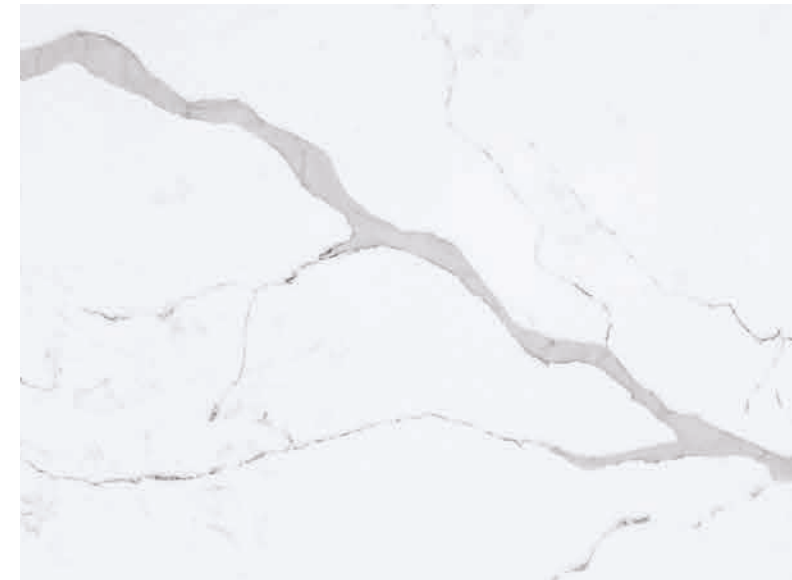

# The unique properties of Itaka

Choosing the best countertop option for your bathroom or kitchen is tough, particularly with kitchens. Choosing the right countertop with all of the alternatives on the market, like marble and granite is a challenge, but when comparing features like staining and scratches, is better to choose quartz.

Itaka Stone is manufactured in Europe, it is the whitest in the world with realistic vein movement and a depth and brilliance of polishing never before seen.

Itaka Stone provides many color tones, styles, and finishes for kitchen countertops and bathroom treatments, complementing many home styles and decorating tastes.

Itaka Stone is **a surface material with outstanding properties** created for kitchen and bath design applications. It offers beauty similar to natural stone in a wide range of colors and extraordinary textures.

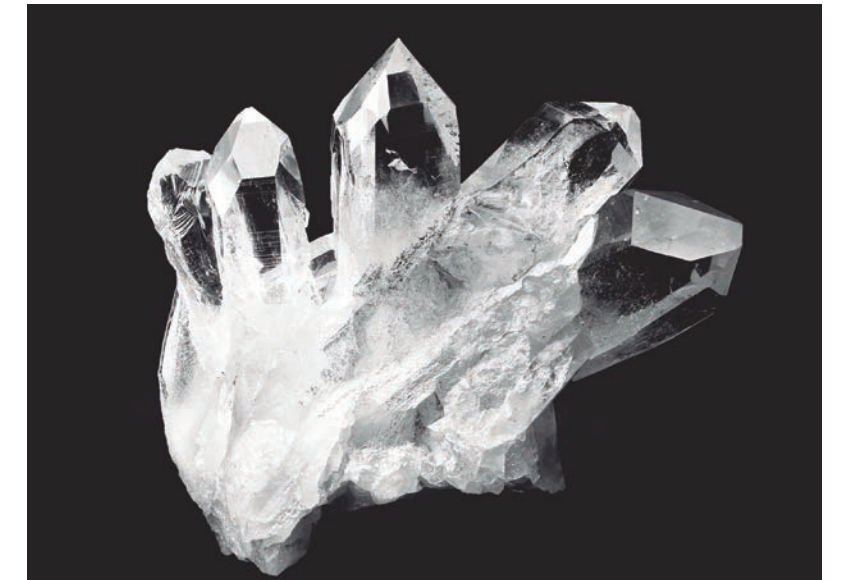

#### Realistic Vein Movement.

Ultra-high definition of Itaka Stone veining is extraordinary, represented in well-defined patterns, remarkable sharpness and tight lines. The movement and shadows produced for Itaka Stone range of colors provide depth and dimension. The effect of different layers created in its patterns makes hard to determine whether is natural stone.

#### Unique Polish.

A degree of polishing never seen before, Itaka Stone offers a smooth shine only comparable to the brilliance of diamonds. World class polished finish characterized by an impressive luster which enables the surface to attract light around and send it back to the space amplifying the feeling of brightness, and to emphasize the color and realism of the veins.

#### Genuine Quartz.

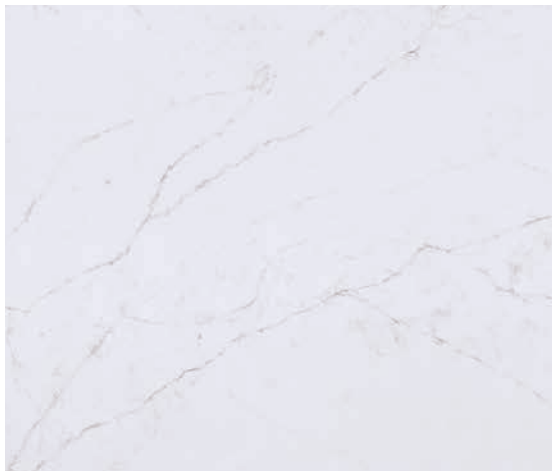

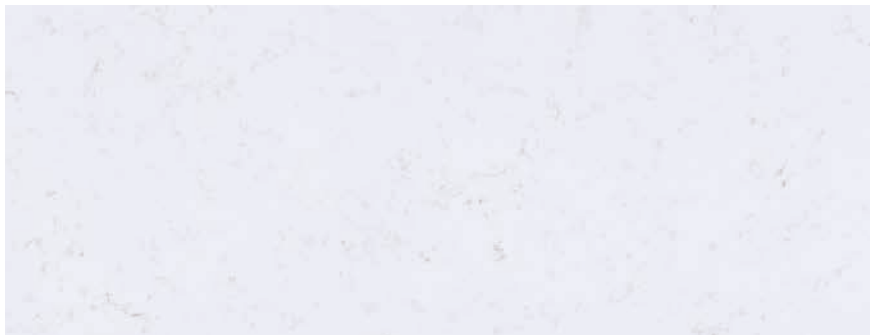

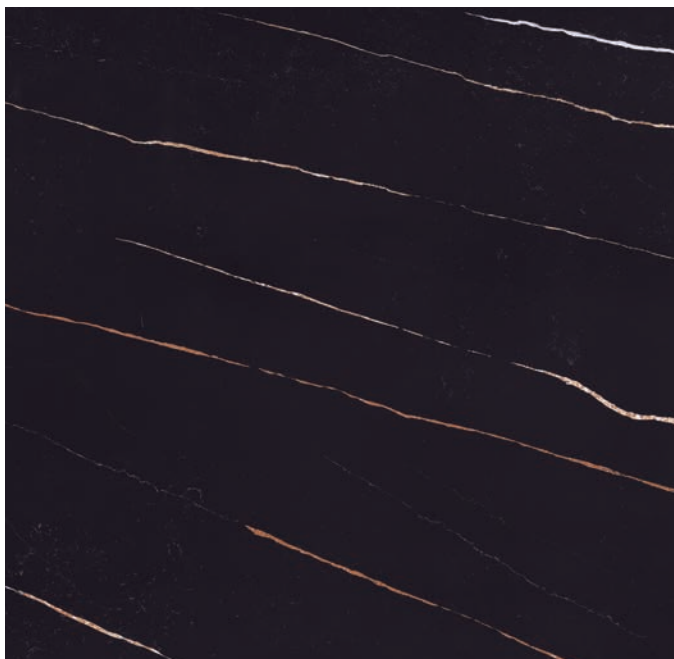

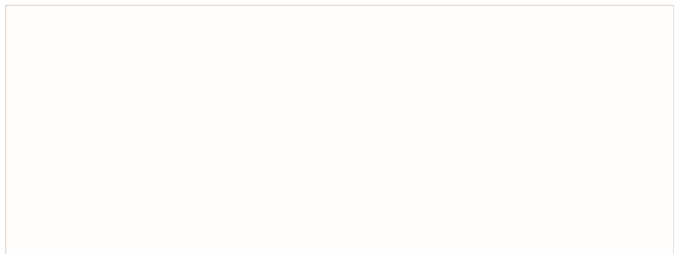

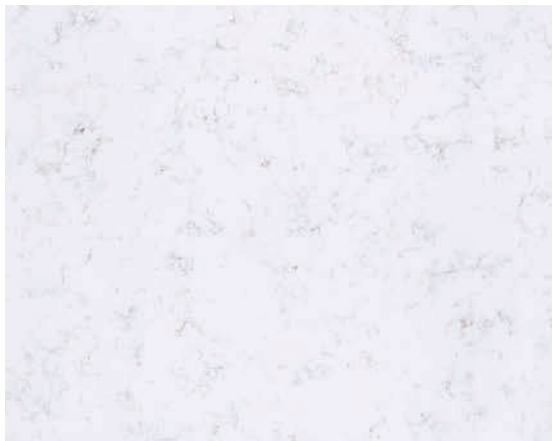

Itaka Stone is the result of a leading-edge manufacturing process which utilizes the most advanced know-how in digital computer control production technology. By reducing the unadulterated quartz raw material to a fine grit-form and blending it with a maximum 6% polyester resin, Itaka Stone delivers a high quality product beyond the established standards.

#### Super white.

Itaka stone is the worlds whitest engineered quartz, it's super white backgrounds are even more stunning than some of the most luxurious white Italian marbles. The white given by Itaka Stone has the magical ability to make any environment look gorgeous and dazzling.

# Epic Kollektion

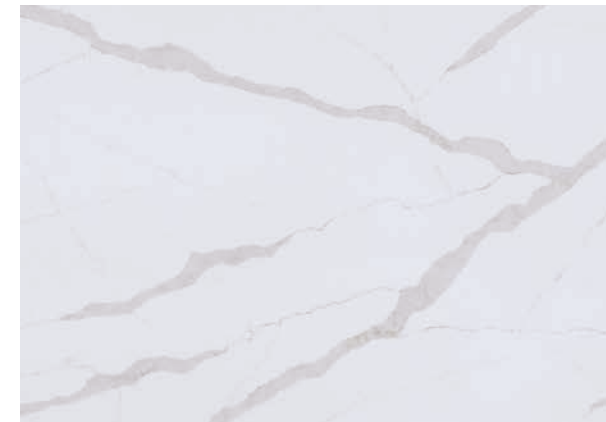

Itaka symbolizes the story of overcoming, knowledge, and determination each person should follow to find their path, in the end, life itself.

Inspired by the grandeur of the characters who played one of the most epic stories ever told, Ulises' adventures, **EPIC COLLECTION represents the essence of the nature** of those places they visited, the beauty of Grecian Gods they found, and the strength and conviction they performed to succeed.

Source of inspiration and wisdom, EPIC COLLECTION show colors full of beauty, character, and naturalness. Truly a passionate trip as Ulises'.

Itaka, an epic journey, an epic collection.

# Athena

Synthesis of simplicity and perfection at once. ATHENA shows continuity, with no shade distracting the pattern. This color clearly highlights the leitmotiv of minimalism: less is more.

Capable of absorbing the light around and project it in a delicate way, ATHENA is the perfect election for any environment. Its clean style is what stands out, permitting other decor elements acquire the main role. An essential for austerity lovers and for those spaces which demand a sense of amplitude.
