

**Dekton® Stonika** is synonymous with hyperrealism, better definition and depth and, most importantly, stays true to the same characteristics that make **Dekton® XGloss** a state-of-the-art ultra-compact surface.

### Hyperrealist Design

Unlike other surfaces, the use of a thick vitreous layer is not necessary with Dekton® XGloss Stonika technology. Consequently, the image is not distorted and allows for greater clarity and realism of the designs.

### Sublime Edges

Dekton® XGloss Stonika is conceived as a unique piece unlike other products where a glassy layer is distinguished.

Its surface layer is almost imperceptible due to the thickness. It's the thinnest in the market and it fuses perfectly with the base by creating a single more compact and resistant material.

### Thermal and Scratch Resistance

Dekton® Stonika belongs to the Xgloss collection, so it keeps the same scratch properties as other polished colors.

Base and surface behave to temperature changes in the same way by avoiding common cracks due to the difference in expansion between the two elements.

Dekton® Stonika

# BERGEN

Inspired by natural Portobello stone, Dekton® Stonika Bergen strives for perfection in tone, structure, and depth. The beauty of its grayish streaks with sculptural pattern on an off-white base makes it a design loaded with personality and elegance.

## TAGA

Inspired by the quartzite of the Taj Mahal, Dekton® Stonika Taga is an interpretation adapted to current trends that maintains the character of natural stone. The general grayish tones with marble and crystalline streaks enhance its natural structure. Its splendid sheen and aesthetic quality contribute to making this a premium model.

Placa Smeg

The dark matte tones in any type of material (leather, wood, etc) produce interesting contrasts that highlight the intense brilliance of Dekton® Stonika Taga.

The golden, earthy and white elements are ideal for creating a contemporary and elegant setting.

Dekton® Stonika Arga creates a striking color balance with **low saturated tones and golden details.**

Dekton® Stonika

# ARGA

Inspired by the quartzite of the Taj Mahal, Dekton® Stonika Arga features the luxury of the natural stone with the properties of Stonika. Its smooth cream background with subtle brownish gold streaks enhance its dramatic structure. A hyperrealist graphic with a dazzling sheen adds depth and richness to this material.

Dekton® Stonika

# SOGNE

Inspired by the famous Gris Pulpis, Dekton® Stonika Sogne is a color with touches of natural stone and cement. Its veined structure and cement background make the Sogne a fusion between the natural and the industrial, showcasing the most elegant elements of both. Its gray finish combines with a clear veined structure that breaks the usual aesthetic rules of color conventions. A proposal with architectural significance, considering both trends and functionality.

# KORSO

Inspired by natural stone, Dekton® Stonika Korso is a color that resembles the delicateness and versatility of Gris Pulpis marble. A color palette based on earthy tones contrasts with random gray streaks of varying intensity. With its combination of dazzling sheen and graphic hyperrealism, the Korso is synonymous with timelessness, visual impact, and big personality.
