Ground Hook Instructions

Take 3' strap and loop around trunk and limb of tree. Thread ends of the strap through opening of buckle and knot to secure.

Tie overhand knot at the end of your 9' strap and slide it into the slot on the ground hook anchor.

Install ground hook anchor into ground using a steel rod and hammer or slide hammer. Drive anchor 24-36 inches deep.

Secure ground hook by pulling up on strap. Thread strap through the back of the buckle attached to tree and pull down for desired tension.
