

Tree Stake

S o l u t i o n s

Terra Toggle Instructions

Take 3' strap and loop around trunk and limb of tree. Thread ends of the strap through buckle and knot to secure.

Thread your 12' strap through your terra toggle anchor by entering it in the slot labeled "1" Continue to thread through slots in ascending order then pull to secure.

Install terra toggle into ground using an auger's pilot hole and push stick or a water jet utilizing the lip at the tip of the terra toggle. Drive anchor 4-5 feet deep.

Secure terra toggle by pulling up on strap. Thread strap through the back of the buckle and pull down for desired tension.
