Dear Sir,

UFT ENGINEERING LTD. are pleased and grateful to have your attention on their activities.

We are willing to serve your organization in the fields where we actually have in house expertise or a confirmed collaboration with accomplished experts. In this regard, we are capable of realizing turnkey projects comprising Steel, Concrete, Construction and Water Works depending on their nature and size.

We are finishing a Process Building (40x40x20m high) in Shagamu comprising concrete and steel works executed by our own staff and workers:
Concrete 1500m3 Form work 275m2 Reinforcement 56 tons
Steel structure 105 tons Roofing and cladding 4200 m2

We completed 3 weeks ahead of time a 5,000,000 liters Vertical Cylinder Tank for petroleum product in Ashaka.

We had erected 3 tanks 5000,000 L parallel together at Apapa Ebafor Jetty Lagos (ELF).

We had finished 2KM 18" pipe line for IBETO Cement packing plant in Port Harcourt.

And 1350 cubic Water fire fighting tank system for AGIP NAOC

Otherwise, **our activities include:**

- Precision Steel frame structures
- Warehouses and Hangars, large canopies
- Industrial Pallet Racking
- Aluminum Roofing and Cladding
- Elevated Tanks with Tower
- Ground Level and Underground Tanks
- Petroleum Products Tanks and Ancillaries
- Associated Piping Fitting and pumping
- Associated Concrete Works and Foundations
- Construction and water works
- Pressure and Heat Industrial Sterilizer
- Water Boreholes, Tanks and Treatment
- Factory Process and Machines Installation
- Floating Pontoons and Jetties

Also Fabrications like:

- Steel Molds and form works
- Screw Conveyers insulated/double wall
- Conveyor Belt and other types
- Cyclones and Air Ducts
- Waste containers
- Pressure Vessels and Heat Exchanger ... By our partners abroad

A n impressive variety of solutions

With more than 37 years' experience and technical expertise, our Storage Tank Division is one of the leading operators in this specialist field.

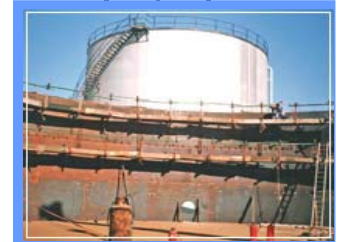

This division of **UFT ENGINEERING** covers all aspects of storage tank provision and on-going maintenance, including tank design, inspection, the specification of required work, preparation of budgets, supply of skilled personnel and management of sub-contractors, as required.

An impressive variety of solutions have been delivered by our Storage Tank Division throughout Nigeria.

Ever conscious of environmental and conservational issues, we have many solutions to offer clients who use storage tanks, large or small, to minimise their loss of product.

Services offered include:

- Design, supply and construction of new tanks
- Storage tank repair and maintenance
- Turnkey handling of projects
- Supply and erection of welded heavy steel structures
- Tank jacking
- Associated pipework and process plant installation
- Tank inspection

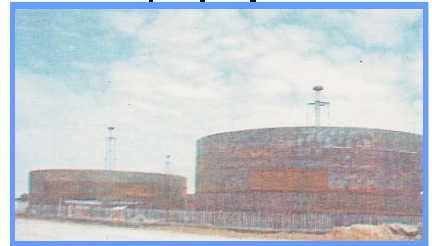

A leader in this specialised field

Storage Tank Division

Delivering fully integrated engineering solutions both in Nigeria and overseas.

Building on an already outstanding reputation and using the latest technology to meet the requirements of a wide range of clients including Shell, Agip and Total.

“Specialist technical support
for storage tanks of all
shapes and sizes”

From double deck roof repairs and floating roof installation to the erection of all tank sizes, **UFT ENGINEERING** Services Storage Tank Division is a specialist contractor offering ongoing technical support on tanks of all shapes and sizes.

An in-house design team providing engineering design expertise compliments services offered.

Design

- Storage tank design API650, Bs2654
- Floating and fixed roof design
- Structural design

UFT

ENGINEERING LTD

“Committed to providing a safe, high quality, dedicated service”

The strength of our reputation and client base speaks for itself.

Project Works

All our projects - regardless of size - are managed by qualified and experience staff who have direct access to the other significant technical and engineering resources and facilities available within the UFT Engineering Solutions.

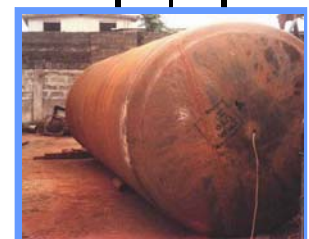

Turnarounds

Employing our own labour, we are flexible in our approach offering assistance with mechanical plant overhauls and shutdowns on either a tailored or turnkey basis. We can either augment a client's existing team, providing additional expertise and resources, or assume complete responsibility for the unit or area in question.

Maintenance

Our maintenance services are available under a variety of contract terms. They range from cover for small manufacturing plants, where the expertise of only one or two skilled personnel is required, right through to major refinery complexes, which may require the skills of 60 or more personnel through out the year. Regardless of the size of the plant, we are committed to providing a safe, high quality, dedicated service.

"Company, plan
and mission"

UFT is an Engineering , Steel fabrication, civil construction company operating in Nigeria and providing these services.

UFT ENGINEERING LTD has built and is Building projects throughout the cross rivers Region Port Harcourt, Lagos and other regions of Nigeria.

It works for both the public and private Sectors on small, as well as large projects, particularly in the oil sector. It has achieved a reputation for timely delivery and innovative management.

Our mission is to provide quality exploration, production and project supervision services to the oil industry, especially in Nigeria and West Africa.

Our Plan is to understand our customer s goals and objectives and assist them in surpassing those goals and objectives.

UFT ENGINEERING LTD specialises in Steel and Civil Construction , storage tank services, Pipeline, Oil Services and a lot of other activities you will go through in this profile.
