

Specification Sheet

Deck Decompression Chamber 60" Twin-Lock DDC

M Dive's Advance Marine build Twin-Lock Deck Decompression Chamber is built into a 20ft ISO container that is fully insulated and climate controlled, allowing it to be deployed to any work location.

Being fully containerised, it is a turnkey package that can be easily transported by road, rail or sea.

The system can be tailored to the client's specification and can also be made to 'IMCA standard', if required.

The chamber includes a small workstation inside that can be used as a remote site office or dive control station.
