

SHAKE WELL BEFORE USE

Application:

For the control of flying and crawling insects such as flies, mosquitoes, ants, cockroaches, wasps, earwigs, silverfish, and other bristle-tails, fleas, beetles, bedbugs, moths, booklice, mites and dust mites by application to hard porous and non-porous surfaces, hard and soft furnishings including bedding.

For amateur use indoors in domestic premises (including kitchens) and outdoors on patios, paths and wasp nests.

For professional use in domestic and commercial situations including kitchens, hospitals (not occupied wards), hotels, restaurants, public and municipal buildings and onboard ships. For use outdoors on patios, paths, amenity areas, transit stations, refuse tips and wasp nests. May be used in cargo holds of aircraft for pre-flight treatment and in refuse vehicles. For use in and around farm buildings, cow byres, pig sheds and milking parlours. For use in poultry houses against red mites and litter beetles. Not for use on grain or in grain stores.

Space sprays containing (non-residual) pyrethroids or pyrethrins must not be used more than once a week against houseflies in intensive or controlled environment, animal houses or refuse/waste treatment sites as they could cause control failure due to insecticide resistance. If more frequent treatments are required, use a product with a different active substance and, if necessary, a different control method (such as a bait).

Directions for use:

SPACE SPRAY for flying insect control: A 5-10 second burst will treat an average sized room (30m³) starting in the centre of a room and directing the spray into all areas of the room.

DIRECT SPRAY: From a distance of 15cm spray directly onto the insect. For crawling insects such as bedbugs - a 2 second spray; for fleas - a 1 second spray.

SURFACE SPRAY: From a distance of 20cm spray directly onto the surface where insects walk, into cracks, crevices and other insect harbourages - a 2-4 second spray.

SINGLE SHOT SPACE SPRAY: Place the can in the centre of the area to be treated. When using multiple cans start at the furthest point from the exit. Press down firmly on trigger to lock into place. The can will take approximately 3 minutes to empty and is sufficient to treat an area of up to 450m³ for flies, 120m³ for moths and fleas and 60m³ for bedbugs, cockroaches and other crawling insects.

NATURAL INSECT KILLER SINGLE SHOT

Broad spectrum, space & surface spray
with a total release trigger

- Controls a wide range of insects
- Natural active ingredient
- Rapid knock-down effect

Controls: flies, mosquitoes, ants, cockroaches, wasps, earwigs, silverfish and other bristle-tails, fleas, beetles, bedbugs, moths, booklice, mites and dust mites

Contains: Chrysanthemum cinerariaefolium extract* 0.2% w/w

*Chrysanthemum cinerariaefolium, extract from open and mature flowers of Tanacetum cinerariifolium obtained with supercritical CO₂

STATUTORY CONDITIONS RELATING TO USE
FOR USE ONLY AS AN INSECTICIDE
FOR AMATEUR USE AND PROFESSIONAL USE
Users must comply in full with all their responsibilities under the control of pesticides regulations 1986 (as amended), including complying with all conditions of approval.

READ ALL PRECAUTIONS BEFORE USE. HSE No. 9928

To avoid risks to man and the environment, comply with the instructions for use.

DO NOT CONTAMINATE FOODSTUFFS, EATING UTENSILS OR FOOD CONTACT SURFACES. This material and its container must be disposed of in a safe way. DO NOT APPLY DIRECTLY TO LIVESTOCK AND POULTRY. EXCLUDE ALL PERSONS AND ANIMALS DURING TREATMENT. COVER ALL WATER STORAGE TANKS before application. All bats are protected under the Wildlife and Countryside Act 1981. Before treating any structure used by bats, consult Natural England, Scottish Natural Heritage or the Countryside Council of Wales. HAZARDOUS TO BEES. ACTION SHOULD BE TAKEN TO PREVENT FORAGING BEES GAINING ACCESS TO TREATED NESTS, PREFERABLY BY REMOVING THE COMBS OR BLOCKING THE NEST ENTRANCE. DO NOT APPLY DIRECTLY TO ANIMALS. EXCLUDE ANIMALS DURING APPLICATION. DO NOT APPLY TO CLOTHING. NOT TO BE USED ON PET BEDDING, PET SLEEPING QUARTERS OR WHERE PETS FREQUENTLY LIE. Protect milk machinery and milk containers from contamination. WASH HANDS AND EXPOSED SKIN before meals and after use. KEEP IN SAFE PLACE. DO NOT TOUCH TREATED SURFACES UNTIL DRY. DO NOT HANDLE TREATED FABRICS UNTIL DRY AND AIR THOROUGHLY BEFORE USE. COLLECT EGGS AND REMOVE FEED, EXPOSED WATER AND MILK BEFORE APPLICATION.

When this product is being used by professional operators the following condition must also be followed: The (COSHH) Control of Substances Hazardous to Health Regulations 2002 (as amended) apply to the use of this product at work. Avoid excessive contamination of coveralls.

Precautions:

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Avoid breathing vapour/spray. Wash contaminated skin thoroughly after handling.

IF ON SKIN: Wash with plenty of water. **IF INHALED:** Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTRE/doctor if you feel unwell. **IF SKIN IRRITATION OCCURS:** Get medical advice/attention. Store in a well-ventilated place. Keep container tightly closed. Store locked up. Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F. Dispose of contents/ container in accordance with national regulations. Repeated exposure may cause skin dryness or cracking. **Contains:** Heptane. Contains chrysanthemum cinerariaefolium extract. May produce an allergic reaction.

Danger:

Extremely flammable aerosol. Pressurised container: may burst if heated. Causes skin irritation. May cause drowsiness or dizziness. Very toxic to aquatic life with long lasting effects.
