## How to setup your WIFI with Google Webpass

---

1- you will need a smart phone or tablet

go to your App Store or Google Play and download Google Home

2- Open Box and plug Power and Ethernet to the ports in the image. Then plug to Wall.

3- Open **Google Home** App :

Using the + **Set up device** icon, select **New Devices**, **Create a home** refers to your unit number, **Next**, and phone **will look for devices** and guide you

You will be asked to **create a SSID or the name for your WIFI**, use something simple like your unit number or a name you like. Next **type a password** that can be all lowercase letters (8 characters or numbers minimum) . At the end you will be shown a screen with all your details. The device will configure any updates it needs.
