

O2 Box Vs. Traditional Chambers & Capsules

O2 Box	Vs	Them
Upright entry, spacious interior, and customizable seating arrangements	Comfort	Users must crawl in and lie down in tight spaces
Relax, take calls, or work on your laptop during a session	User Experience	No devices allowed. Limited mobility
No prescription, license, or clinical supervision needed. No clothing restrictions and no need to leave your phone or laptop behind. Sessions are safe, comfortable, and user-friendly.	Safety	May require medical clearance, supervision, oxygen tanks, and strict protocols
Certified installers build your O2 Box onsite with no major renovations required. Certified training for your staff is included. Panels fit through standard doors.	Installation	Bulky units often require cranes or major construction to install and operate
No daily consumables. Simple wipe-downs and semi-annual filter replacement.	Maintenance	May require ongoing medical-grade supplies and staff
No license needed to operate. High ROI potential with low overhead.	Business Friendly	Requires licensed professionals, higher liability, and medical-grade oversight
Ambient air at 1.3 ATA with 30 to 50 percent oxygen absorption (with cannula or mask)	Oxygen Delivery	100 percent oxygen at high pressure. Greater risk of oxygen toxicity.
Classified as wellness equipment. No medical claims or regulatory burden	Regulatory	Regulated as medical devices. Prescriptions and compliance required
Sleek, modern design that enhances your brand presence	Aesthetic & Design	Medical or industrial look not suited for client-facing spaces
Quiet operation that doesn't disrupt your space or client experience	Noise	Louder compressors and tanks often housed in-room

Disclaimer: O2 Box is a mild hyperbaric oxygen therapy (mHBOT) system intended for general wellness use. It is not a medical device and is not intended to diagnose, treat, or cure any medical condition. Comparisons are made between mHBOT and capsule-style or medical-grade hyperbaric chambers for informational purposes only.
