Simple and easy to use, the whole bracket does not take up any space. In order to be consistent with the height of the display, there is really no mistake in buying. It has arrived yesterday evening right in time for me to put it to use. I cannot tell you how stoked I am with its craftsmanship. It is super sturdy and holds my HP laptop at any angle that I place it in. I have a new HP and it's thin and fits the bottom holder hooks perfectly. Just be mindful that your computer isn't super thick as that may pose a problem with the holder hooks since they are not tall. But all in all this stand is worth every penny and more. Two thumbs WAY UP!

★★★★★

This still gets 5 stars because it is sturdy enough if you just put your regular laptop on it and nothing else!

★★★★★

I used to place my laptop on flat surface and that made my laptop's temperature to increase that it slows down my laptop but then after using this laptop stand my laptop doesn't slows or overheat like before anymore and made my laptop to have stable normal operation

I had tried to save money and purchased a cheaper (in all aspects lol) stand. Needless to say, I returned it and found this one. I can't tell you how happy I am with it. It arrived yesterday evening right in time for me to put it to use. I cannot tell you how stoked I am with its craftsmanship. It is super sturdy and holds my HP laptop at any angle that I place it in. I have a new HP and it's thin and fits the bottom holder hooks perfectly. Just be mindful that your computer isn't super thick as that may pose a problem with the holder hooks since they are not tall. But all in all this stand is worth every penny and more. Two thumbs WAY UP!
