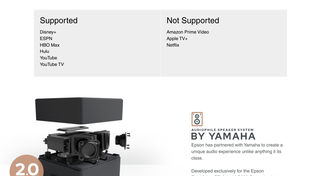
STUNNING PICTURE QUALITY

Create an immersive viewing experience virtually anywhere for watching TV shows, sporting events, movies, gaming, and more.

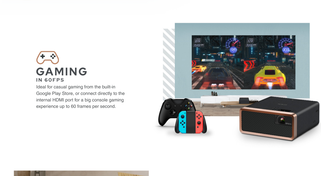


MICROLASER PROJECTION TECHNOLOGY

Unique multi-array laser diode technology to produce an exceptional level of brightness while significantly enhancing the black density. The result is an exceptionally bright and clear image.

ELEGANT COMPACT DESIGN

Designed with simplicity in mind, the Epson EpiqVision Family of Streaming Laser Projectors have a clean, compact and modern design to beautifully fit within any décor – and perfect for moving from location to location.



Powered by android TV

Chromecast built-in

Featuring built-in Android TV™ and wireless connectivity, the Epson EpiqVision EF12, EF100 and LS300 give you seamless access to popular streaming services including Hulu, HBO, Disney+ and YouTube, right out of the box.

With Chromecast™ Built-In, you can wirelessly cast your favourite content directly from your Apple®, Windows®, or Android™ smart phone, tablet, or computer.
