Voted The #1 Tilt Head of 2021

Stop missing shots trying to adjust your tripod. flexsmart™ will easily extend your camera beyond obstacles and take your photography to the next level.

Easy One-Hand Installation

Sometimes life only gives you a few seconds to take the shot. If you aren't prepared, you'll miss the opportunity. flexsmart™ installation takes a moment. It has no locks, no buttons, or knobs. Simply set the angle as desired and it will hold the exact position.

Universal Design

flexsmart™ is Not Camera Specific and allows you to handle any digital camera and DSLM camera through a standard screw socket on the bottom. It also comes with an Allen key for adjusting tightness that is easy to carry.

Flex Your Way to Shoot

This Z shape bracket has a 360-degree rotation that can be adjusted freely to help for ideal shooting easily. It contains two pivots connected to three planes.

Durable

Unlike other brands, the body of flexsmart™ is made of CNC Machined Aluminium alloy with black anodized treatment for higher durability, it can withstand up to 6.7lb/3Kg.

Use Anywhere

Lightweight and portable, flexsmart™ is more convenient and faster than the ordinary ball head or tripod. Use it anytime, anywhere.

☆☆☆☆☆ "This little device has opened up many more options in positioning my camera. I have been able to put the Z up and use it as its own tripod. I like that this doesn't block access to my battery port on my camera, so I can easily replace batteries without taking the camera off the mount. I'm glad I bought it." - Josh

Frequently Asked Questions

Q: What are the benefits of using a flexsmart™ Pan & Tilt Head?

A: This is the best tool if you're a single-crew.

It easily helps to find the right angle or go for dolly shots without any shakes that allows you to take unique and professional photos.

Q: How much weight can it carry?

A: It can carry any camera gear up to 6.7lb/3Kg.

Q: How far can it extend?

A: It can fully extend up to 6.7inches / 17cm in total with 2 pivot points connecting three planes only.

Q: Is it light to carry?

A: It sure is! As only palm-sized, you can carry it easily. Folded up length 90mm/3.5inch, width 90mm/3.5 inch.

Q: What kind of tripod head do I need to attach it?

A: You can use flexsmart™ alone without a tripod. Or you can screw it onto a standard tripod, video track slider, stabilizer gimbal, quick release plate, monopod, camera rig, camera cage, and other different devices of photography through a 1/4" and 3/8" threaded screw hole on the bottom.

Q: What devices can the tilt work with?

A: It is a universal device. It comes with a 1/4" screw on the top, which fits for most DSLM and digital cameras, such as Canon PowerShot EOS 80D T6 5D Mark i6D 60D 7D 70D 77D D800 T6i 1300D Sony a7riii a7rii A7S a6000 a6300 a6500 W800 Nikon B500 D750 D850 D3400 D3300 D5600 D5300 D7200 Panasonic Lumix GH5 GH4 GH3, etc.

This is one of the few times a product has exceeded my expectations as much as this one has. I was expecting hopefully usable leveler but what I received was a fine piece of machinery. All of the wheel threads are very smooth and precise, highly well engineered fine tuning adjustment. I recommend this leveler, and if I ever need another, I'd purchase this one again in a heartbeat.

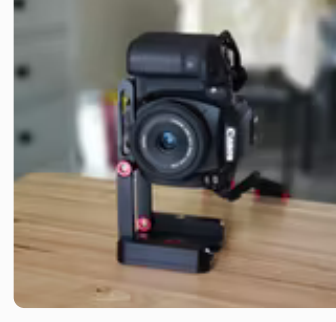

M★★★★★ Megan Hussey

This flex tripod head can freely adjust forward and back as well sit straight. Can handle vertical shooting as well which is really nice. No need for a quick release plate since it's really easy to screw my camera on and off with the wide dial

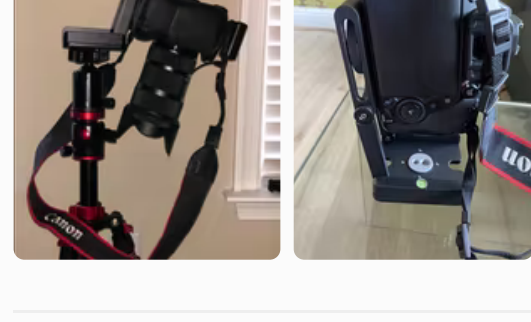

E★★★★★ Emily Smith

well made nice looking item. It will be a great addition to my camera

D★★★★★ Davie Broughton

I'm actually kinda impressed by this. So far it's great. True, as in my case, you have to tighten it a bit to get it to stay. I would say that's just common sense when using it. I've tried it with stars, macro, even rotating the camera 90 degrees for a vertical shot. It fits all four of my tripods because of the two different thread sizes on the base, or sits flat and stable on its own. The large wheel to tighten the camera to the z stand is a nice touch and feels solid. No finger cramping, pinching, etc. It sits tight if the balance is right, common sense.

G★★★★★ Giles Rosenbaum

It works great. I'm happy with my purchase. Thank you
