Mission Statement of New Moon Coven

New Moon Eclectics Coven exists to honor the Sacred through devotion, education, service, and the responsible practice of modern witchcraft.

We are dedicated to fostering a thriving spiritual community rooted in integrity, inclusivity, ecological stewardship, and the protection of religious freedom for all witches and practitioners of the Craft.

We uphold the principle that **all beings, all paths, and all seekers carry inherent worth**, and we commit ourselves to creating a safe, empowering environment where individuals may explore, learn, and grow in their spiritual practice. Our coven stands for **ethical leadership, transparent governance, and compassionate community engagement**, ensuring that our actions reflect the highest ideals of our tradition.

We serve our community through **ritual, education, outreach, and advocacy**, preserving the Mysteries while offering accessible pathways for sincere seekers. We honor the Earth as sacred, pledging to protect her waters, forests, creatures, and cycles through mindful living and active stewardship.

As a coven, we rise to defend the rights of witches everywhere, working with interfaith partners, legal advocates, and spiritual communities to ensure that **Wiccan and witchcraft traditions are respected, understood, and protected**.

In perfect love and perfect trust, we walk this path together — guided by truth, strengthened by unity, and illuminated by the ever-renewing light of the Moon.
