

## **What Makes a SaveryTech Rescue Different?**

Every SaveryTech Rescue computer undergoes a multi-stage refurbishment, testing, and certification process before it is offered for sale. Unlike many refurbished computers that receive only a basic reset and cleaning, each SaveryTech Rescue system is individually inspected, configured, tested, and documented to provide a ready-to-use experience.

Included with Every SaveryTech Rescue:

- **Professional Inspection and Testing**
  - Every system undergoes extensive hardware and operating system testing to verify proper functionality before being approved for sale.
- **Battery Health Evaluation**
  - Laptop batteries are individually evaluated and graded according to the SaveryTech Professional Grading Scale so customers know exactly what to expect.

- **Security Configuration**
  - Systems are reviewed and configured with modern Windows security features, including Microsoft Defender protection, SmartScreen protection, and firewall protection.
- **Windows Optimization**
  - Each computer is configured to provide a stable and reliable Windows experience while minimizing unnecessary software and performance issues.
- **Windows Activation Verification**
  - Every system is verified to have a properly activated copy of Windows before shipment.
- **Hardware Certification**
  - Key hardware components including storage devices, memory, networking, graphics, and processors are verified for proper operation.
- **Documentation Package**
  - Customers receive access to SaveryTech support documentation, grading information, warranty information, and product resources.
- **Personalization and Finishing**
  - Each system includes SaveryTech custom backgrounds and branding resources designed to provide a polished out-of-box experience.
- **No Bloatware**
  - Systems are delivered free from unnecessary trial software and unwanted third-party applications.
- **Quality Assurance Review**
  - Every computer receives a final quality inspection before being approved for inventory and customer sale.
- **Our Goal**
  - Our mission is to extend the useful life of quality business-class computers while reducing electronic waste and providing customers with dependable, affordable technology.
  - Every SaveryTech Rescue computer is professionally prepared, individually tested, and certified before it reaches its new owner.
