

LIBRARY INFORMATION AND TECHNOLOGY PROGRAMS

The purpose of the Nespelem School District library information and technology programs is to support student mastery of the essential academic learning requirements and state standards in all subject areas. The programs will provide a broad, flexible array of services, resources, and instruction.

The superintendent will establish procedures for the selection of materials with the understanding that media literacy resources will consist of a balance of sources and perspectives. Residents or staff members of the district who wish to express a concern about specific material included in the collection may do so according to the procedures outlined in 2020P, with the understanding that the criteria and rationale for reconsideration of library resources differs from the criteria and rationale for reconsideration of classroom/curricular instructional materials.
