

DELAWARE COUNTY LEAD HAZARD REDUCTION PROGRAM

HOMEOWNER APPLICATION

Date Completed: _____

APPLICANT INFORMATION

Applicant/Homeowner Name: _____ Date of Birth: _____

Address: _____

Municipality: _____ Zip Code: _____

Telephone Numbers: _____ (Cell/Home/Work)
_____ (Cell/Home/Work)
_____ (Cell/Home/Work)

E-mail Address: _____

Co-Applicant Name: _____ Date of Birth: _____

Telephone Numbers: _____ (Cell/Home/Work)
_____ (Cell/Home/Work)
_____ (Cell/Home/Work)

E-mail Address: _____

DEMOGRAPHIC INFORMATION

The race and ethnicity information below is requested solely for the purpose of determining compliance with Federal civil rights law and for the U.S. Department of Housing and Urban Development reporting requirements.

Your response will not affect consideration of your application.

Applicant Ethnicity (Please check one): [] Hispanic/Latino [] Non-Hispanic/Latino

Applicant Race (Please check one):

- [] White [] Asian and White
[] Black/African American [] Black/African American and White
[] Asian [] Native Indian/Alaskan Native and White
[] Native American/Alaskan Native [] Native American/Alaskan Native and Black/African American
[] Native Hawaiian/Other Pacific Islander [] Other/Multi-Racial

HOUSEHOLD COMPOSITION

1. Is the Head of Household a female? (Circle one) YES NO
2. How many people live in the Household? _____
 How many of these are adults (18 and over)? _____
 How many of these are young children (under 6)? _____
 How many of these have a disability? _____
3. Have children in the household been tested for lead? (Circle one) YES NO
 Are you interested in receiving information on lead testing? YES NO

List the **Head of the Household first**, and then all individuals who live in the house. Indicate relationship of each member as Husband, Wife, Child, Aunt, etc.

**Proof of age for children 6 and under must be attached to this application.*

**If lead testing has been done, include if the child received an Elevated Blood Level (EBL) 5µg/dL*

Full Name	Relationship	Age*	Tested EBL (Y/N?)

Please attach another sheet if necessary

PROOF OF INCOME

You must attach the appropriate proof of income for the previous 12 months for **all household members over the age of 18** who reside at in the household. You may use a W-2 form(s) to document previous year income. You may be requested to provide updated financial information to fully document your eligibility for the program.

What Is Income?

- Wages, salaries, tips, etc. (Provide 3 most recent paystubs for all household members over the age of 18)
- Taxable interest
- Dividends

- Taxable refunds, credits, offsets of State and local income taxes
- Alimony (or separate maintenance payments) received
- Business income (or loss)
- Capital Gain (or loss)
- Other gains (i.e. assets used in a trade or business that were exchanged or sold)
- Taxable amount of individual retirement accounts (IRA) distributions. (Includes simplified employee pension (SEP) and savings incentive match plan for employees (SIMPLE IRA))
- Taxable amount of pension and annuity payments
- Rental real estate, royalties, partnerships, S corporations, trusts, etc.
- Farm Income (or loss)
- Unemployment compensation payments
- Taxable amount of social security benefits
- Other income (Including prizes, awards, gambling, Lottery, raffle winnings, and periodic assistance or any other payments or contributions which are received on a recurrent basis and which might be reasonably expected to continue).

Complete the following table using the Definition of Income above:

	Applicant	Co-Applicant	Other Household Member over 18	Other Household Member over 18
Name				
Wages, Salaries, Tips				
Interest and Dividends				
Taxable Refunds				
Alimony				
Business Income				
Capital Gain				
IRA Distributions				
Pensions, Annuities				
Unemployment				
Social Security				
Other Income				
TOTAL ANNUAL INCOME				

Please attach another sheet if necessary

Total annual income of all Adults (18 or over) living in the household \$ _____

PROPERTY & MORTGAGE DETAILS

1. What year was the property built? _____
2. How many bedrooms are in the home? _____
3. Has lead testing ever been conducted in your home?
If so, which areas tested positive? _____
4. Do you have a mortgage on the property? YES NO
First Mortgage Value: \$ _____
Second Mortgage Value: \$ _____
5. Are there any liens/judgements on the property? YES NO
If yes, please describe: _____
6. Are taxes current? YES NO
7. Have you ever filed for bankruptcy? YES NO
If Yes, what year did you file? _____
8. Do you own any other real estate? YES NO
If yes, please provide address and date of purchase: _____
9. Do you rent out any part of the home? YES NO

CERTIFICATIONS

The following certifications are required by law for federally funded programs:

1. I certify that each person in the household is:

A citizen of the United States

A legal resident Alien

2. I certify that all information in this application, and all information furnished in support of this application, is given for the purpose of obtaining a loan under Title I of the Housing and Community Development Act of 1974 and is true and complete to the best of the Applicant(s) knowledge and belief.

3. I understand that under the U.S.C. Title 18, Section 1001, any untruthful or deliberately misleading statements made by me on this application or my use of any untruthful or misleading statement on a document supporting this application can result in prosecution under Federal Law, and that I can be fined, not more than \$10,000 and/or imprisoned for more than five (5) years if found guilty.

4. _____ (Initial) I have received the Delaware County Lead Hazard Reduction Program Guide and will abide by the policies and procedures as outlined within it.

5. _____ (Initial) I consent to participate in a one (1) year follow-up inspection on lead abatement work completed.

6. _____ (Initial) I will adhere to the applicant eligibility requirements of the Lead Hazard Reduction Program for a period of three (3) years.

DELAWARE COUNTY LEAD HAZARD REDUCTION PROGRAM
PROGRAM APPLICATION DOCUMENTATION

**REQUIRED APPLICATION DOCUMENTATION CHECKLIST
HOMEOWNER OCCUPIED APPLICATION**

Please include the following documents with your application to the Lead Hazard Reduction Program. The application will be considered incomplete without **all** applicable attachments.

- ❖ **Copy of deed/proof of ownership**
- ❖ **Copy of most recent mortgage statement**
- ❖ **Death Certificate (if applicable)**
- ❖ **Declaration Page of your Homeowner's Insurance**
- ❖ **Proof of Income for all persons in the household**
- ❖ **Proof of Age for children under 6 (birth certificates, etc.)**
- ❖ **Proof that your taxes are current**
 - Real Estate
 - School
 - Township
- ❖ **Signed Child Occupied Unit Certification**
- ❖ **Signed Blood Lead Screen Form/Waiver**
 - Blood lead testing results (if applicable)
- ❖ **Signed Lead Receipt #1**

PROGRAM APPLICATION DOCUMENTATION

**LEAD HAZARD REDUCTION PROGRAM
Child Occupied Unit Certification**

Resident Name: _____

Resident Address: _____

I hereby certify that children under the age of six (6) years old spend up to 60 hours a year at this residence.

Name of Child(ren)	Date of Birth	Age	Relationship to Applicant	Name of Parent/Guardian of Child(ren)

I certify that all information in this affidavit, and all information furnished in support of my application for eligibility for the **Delaware County Lead Hazard Reduction Program** is true and complete to the best of my knowledge and belief.

I understand that under the U.S.C. Title 18, Section 1001, any untruthful or deliberately misleading statements made by me on this application or my use of any untruthful or misleading statements on a document supporting my application can result in prosecution under Federal Law.

DELAWARE COUNTY LEAD HAZARD REDUCTION PROGRAM
PROGRAM APPLICATION DOCUMENTATION

LEAD HAZARD REDUCTION PROGRAM
BLOOD LEAD SCREENING RELEASE FORM/WAIVER

Resident Name: _____

Resident Address: _____

It is strongly recommended that all children under the age of six (6) have their blood lead level tested. Lead poisoning can cause permanent damage to children – especially babies and kids under seven. Lead poisoning can cause learning disabilities, aggressive behavior, ADHD, decreased IQ, hearing loss and speech delays. A child is considered to have an Elevated Blood Level (EBL) or poisoned if their blood lead test result is 5 mcg/dL or higher.

The Delaware County Lead Hazard Reduction Program requests testing information, or waiver of testing, as a requirement for application and will strictly adhere to Personally Identifiable Information (PII) policies when it comes to the handling of medical information. Children with elevated blood level results will be referred for appropriate medical follow-up with their health care provider or local healthcare service agencies. Parents who wish to have their child (children) tested can also be referred to appropriate providers.

Please initial one of the following that best describes your household:

- ❖ ____ My child (children) under six **have** had their blood lead levels tested in the past six (6) month preceding lead reduction work. I agree to forward this information to the Delaware County Lead Hazard Reduction Program.
- ❖ ____ My child (children) under six **have not** had their blood lead levels test in the past six (6) months and I agree to have them tested. I agree to forward testing to the Delaware County Lead Hazard Reduction Program.
- ❖ ____ For religious and/or personal reasons, **I choose not to have my child (children) tested** for lead poisoning. I am aware of the risks associated with not knowing whether my child (children) is (are) lead poisoned.

I/We voluntarily disclose this information. I/We understand that disclosure of this information will only be used for the purposes of the Lead Hazard Control Program.

THE LEAD-SAFE CERTIFIED GUIDE TO RENOVATE RIGHT

CAUTION CAUTION CAUTION CAUTION CAUTION CAUTION

1-800-424-LEAD (5323)

epa.gov/getleadsafe

EPA-740-K-10-001

Revised September 2011

Important lead hazard information for families, child care providers and schools.

This document may be purchased through the U.S. Government Printing Office online at bookstore.gpo.gov or by phone (toll-free): 1-866-512-1800.

IT'S THE LAW!

Federal law requires contractors that disturb painted surfaces in homes, child care facilities and schools built before 1978 to be certified and follow specific work practices to prevent lead contamination. Always ask to see your contractor's certification.

Federal law requires that individuals receive certain information before renovating more than six square feet of painted surfaces in a room for interior projects or more than twenty square feet of painted surfaces for exterior projects or window replacement or demolition in housing, child care facilities and schools built before 1978.

- Homeowners and tenants: renovators must give you this pamphlet before starting work.
- Child care facilities, including preschools and kindergarten classrooms, and the families of children under six years of age that attend those facilities: renovators must provide a copy of this pamphlet to child care facilities and general renovation information to families whose children attend those facilities.

WHO SHOULD READ THIS PAMPHLET?

This pamphlet is for you if you:

- Reside in a home built before 1978.
- Own or operate a child care facility, including preschools and kindergarten classrooms, built before 1978, or
- Have a child under six years of age who attends a child care facility built before 1978.

You will learn:

- Basic facts about lead and your health.
- How to choose a contractor, if you are a property owner.
- What tenants, and parents/guardians of a child in a child care facility or school should consider.
- How to prepare for the renovation or repair job.
- What to look for during the job and after the job is done.
- Where to get more information about lead.

This pamphlet is not for:

- **Abatement projects.** Abatement is a set of activities aimed specifically at eliminating lead or lead hazards. EPA has regulations for certification and training of abatement professionals. If your goal is to eliminate lead or lead hazards, contact the National Lead Information Center at **1-800-424-LEAD (5323)** for more information.
- **“Do-it-yourself”** projects. If you plan to do renovation work yourself, this document is a good start, but you will need more information to complete the work safely. Call the National Lead Information Center at **1-800-424-LEAD (5323)** and ask for more information on how to work safely in a home with lead-based paint.
- **Contractor education.** Contractors who want information about working safely with lead should contact the National Lead Information Center at **1-800-424-LEAD (5323)** for information about courses and resources on lead-safe work practices.

RENOVATING, REPAIRING, OR PAINTING?

- Is your home, your building, or the child care facility or school your children attend being renovated, repaired, or painted?
- Was your home, your building, or the child care facility or school where your children under six years of age attend built before 1978?

If the answer to these questions is YES, there are a few important things you need to know about lead-based paint.

This pamphlet provides basic facts about lead and information about lead safety when work is being done in your home, your building or the child care facility or school your children attend.

The Facts About Lead

- Lead can affect children's brains and developing nervous systems, causing reduced IQ, learning disabilities, and behavioral problems. Lead is also harmful to adults.
 - Lead in dust is the most common way people are exposed to lead. People can also get lead in their bodies from lead in soil or paint chips. Lead dust is often invisible.
 - Lead-based paint was used in more than 38 million homes until it was banned for residential use in 1978.
 - Projects that disturb painted surfaces can create dust and endanger you and your family. Don't let this happen to you. Follow the practices described in this pamphlet to protect you and your family.
-

LEAD AND YOUR HEALTH

Lead is especially dangerous to children under six years of age.

Lead can affect children's brains and developing nervous systems, causing:

- Reduced IQ and learning disabilities.
- Behavior problems.

Even children who appear healthy can have dangerous levels of lead in their bodies.

Lead is also harmful to adults. In adults, low levels of lead can pose many dangers, including:

- High blood pressure and hypertension.
- Pregnant women exposed to lead can transfer lead to their fetuses. Lead gets into the body when it is swallowed or inhaled.
- People, especially children, can swallow lead dust as they eat, play, and do other normal hand-to-mouth activities.
- People may also breathe in lead dust or fumes if they disturb lead-based paint. People who sand, scrape, burn, brush, blast or otherwise disturb lead-based paint risk unsafe exposure to lead.

What should I do if I am concerned about my family's exposure to lead?

- A blood test is the only way to find out if you or a family member already has lead poisoning. Call your doctor or local health department to arrange for a blood test.
- Call your local health department for advice on reducing and eliminating exposures to lead inside and outside your home, child care facility or school.
- Always use lead-safe work practices when renovation or repair will disturb painted surfaces.

For more information about the health effects of exposure to lead, visit the EPA lead website at epa.gov/lead/pubs/leadinfo or call 1-800-424-LEAD (5323).

There are other things you can do to protect your family every day.

- Regularly clean floors, window sills, and other surfaces.
- Wash children's hands, bottles, pacifiers, and toys often.
- Make sure children eat a healthy, nutritious diet consistent with the USDA's dietary guidelines, that helps protect children from the effects of lead.
- Wipe off shoes before entering the house.

WHERE DOES THE LEAD COME FROM?

Dust is the main problem.

The most common way to get lead in the body is from dust. Lead dust comes from deteriorating lead-based paint and lead-contaminated soil that gets tracked into your home. This dust may accumulate to unsafe levels. Then, normal hand-to-mouth activities, like playing and eating (especially in young children), move that dust from surfaces like floors and window sills into the body.

Home renovation creates dust.

Common renovation activities like sanding, cutting, and demolition can create hazardous lead dust and chips.

Proper work practices protect you from the dust.

The key to protecting yourself and your family during a renovation, repair or painting job is to use lead-safe work practices such as containing dust inside the work area, using dust-minimizing work methods, and conducting a careful cleanup, as described in this pamphlet.

Other sources of lead.

Remember, lead can also come from outside soil, your water, or household items (such as lead-glazed pottery and lead crystal). Contact the National Lead Information Center at 1-800-424-LEAD (5323) for more information on these sources.

CHECKING YOUR HOME FOR LEAD-BASED PAINT

Older homes, child care facilities, and schools are more likely to contain lead-based paint.

Homes may be single-family homes or apartments. They may be private, government-assisted, or public housing. Schools are preschools and kindergarten classrooms. They may be urban, suburban, or rural.

You have the following options:

You may decide to assume your home, child care facility, or school contains lead.

Especially in older homes and buildings, you may simply want to assume lead-based paint is present and follow the lead-safe work practices described in this brochure during the renovation, repair, or painting job.

You can hire a certified professional to check for lead-based paint.

These professionals are certified risk assessors or inspectors, and can determine if your home has lead or lead hazards.

- A certified inspector or risk assessor can conduct an inspection telling you whether your home, or a portion of your home, has lead-based paint and where it is located. This will tell you the areas in your home where lead-safe work practices are needed.
- A certified risk assessor can conduct a risk assessment telling you if your home currently has any lead hazards from lead in paint, dust, or soil. The risk assessor can also tell you what actions to take to address any hazards.
- For help finding a certified risk assessor or inspector, call the National Lead Information Center at 1-800-424-LEAD (5323).

You may also have a certified renovator test the surfaces or components being disturbed for lead by using a lead test kit or by taking paint chip samples and sending them to an EPA-recognized testing laboratory. Test kits must be EPA-recognized and are available at hardware stores. They include detailed instructions for their use.

FOR PROPERTY OWNERS

You have the ultimate responsibility for the safety of your family, tenants, or children in your care.

This means properly preparing for the renovation and keeping persons out of the work area (see p. 8). It also means ensuring the contractor uses lead-safe work practices.

Federal law requires that contractors performing renovation, repair and painting projects that disturb painted surfaces in homes, child care facilities, and schools built before 1978 be certified and follow specific work practices to prevent lead contamination.

Make sure your contractor is certified, and can explain clearly the details of the job and how the contractor will minimize lead hazards during the work.

- You can verify that a contractor is certified by checking EPA's website at epa.gov/getleadsafe or by calling the National Lead Information Center at 1-800-424-LEAD (5323). You can also ask to see a copy of the contractor's firm certification.
- Ask if the contractor is trained to perform lead-safe work practices and to see a copy of their training certificate.
- Ask them what lead-safe methods they will use to set up and perform the job in your home, child care facility or school.
- Ask for references from at least three recent jobs involving homes built before 1978, and speak to each personally.

Always make sure the contract is clear about how the work will be set up, performed, and cleaned.

- Share the results of any previous lead tests with the contractor.
- You should specify in the contract that they follow the work practices described on pages 9 and 10 of this brochure.
- The contract should specify which parts of your home are part of the work area and specify which lead-safe work practices will be used in those areas. Remember, your contractor should confine dust and debris to the work area and should minimize spreading that dust to other areas of the home.
- The contract should also specify that the contractor will clean the work area, verify that it was cleaned adequately, and re-clean it if necessary.

If you think a worker is not doing what he is supposed to do or is doing something that is unsafe, you should:

- Direct the contractor to comply with regulatory and contract requirements.
- Call your local health or building department, or
- Call EPA's hotline 1-800-424-LEAD (5323).

If your property receives housing assistance from HUD (or a state or local agency that uses HUD funds), you must follow the requirements of HUD's Lead-Safe Housing Rule and the ones described in this pamphlet.

FOR TENANTS AND FAMILIES OF CHILDREN UNDER SIX YEARS OF AGE IN CHILD CARE FACILITIES AND SCHOOLS

You play an important role ensuring the ultimate safety of your family.

This means properly preparing for the renovation and staying out of the work area (see p. 8).

Federal law requires that contractors performing renovation, repair and painting projects that disturb painted surfaces in homes built before 1978 and in child care facilities and schools built before 1978, that a child under six years of age visits regularly, to be certified and follow specific work practices to prevent lead contamination.

The law requires anyone hired to renovate, repair, or do painting preparation work on a property built before 1978 to follow the steps described on pages 9 and 10 unless the area where the work will be done contains no lead-based paint.

If you think a worker is not doing what he is supposed to do or is doing something that is unsafe, you should:

- Contact your landlord.
- Call your local health or building department, or
- Call EPA's hotline 1-800-424-LEAD (5323).

If you are concerned about lead hazards left behind after the job is over, you can check the work yourself (see page 10).

PREPARING FOR A RENOVATION

The work areas should not be accessible to occupants while the work occurs.

The rooms or areas where work is being done may need to be blocked off or sealed with plastic sheeting to contain any dust that is generated. Therefore, the contained area may not be available to you until the work in that room or area is complete, cleaned thoroughly, and the containment has been removed. Because you may not have access to some areas during the renovation, you should plan accordingly.

You may need:

- Alternative bedroom, bathroom, and kitchen arrangements if work is occurring in those areas of your home.
- A safe place for pets because they too can be poisoned by lead and can track lead dust into other areas of the home.
- A separate pathway for the contractor from the work area to the outside in order to bring materials in and out of the home. Ideally, it should not be through the same entrance that your family uses.
- A place to store your furniture. All furniture and belongings may have to be moved from the work area while the work is being done. Items that can't be moved, such as cabinets, should be wrapped in plastic.
- To turn off forced-air heating and air conditioning systems while the work is being done. This prevents dust from spreading through vents from the work area to the rest of your home. Consider how this may affect your living arrangements.

You may even want to move out of your home temporarily while all or part of the work is being done.

Child care facilities and schools may want to consider alternative accommodations for children and access to necessary facilities.

DURING THE WORK

Federal law requires contractors that are hired to perform renovation, repair and painting projects in homes, child care facilities, and schools built before 1978 that disturb painted surfaces to be certified and follow specific work practices to prevent lead contamination.

The work practices the contractor must follow include these three simple procedures, described below:

1. Contain the work area. The area must be contained so that dust and debris do not escape from that area. Warning signs must be put up and plastic or other impermeable material and tape must be used as appropriate to:

- Cover the floors and any furniture that cannot be moved.
- Seal off doors and heating and cooling system vents.
- For exterior renovations, cover the ground and, in some instances, erect vertical containment or equivalent extra precautions in containing the work area.

These work practices will help prevent dust or debris from getting outside the work area.

2. Avoid renovation methods that generate large amounts of lead-contaminated dust. Some methods generate so much lead-contaminated dust that their use is prohibited.

They are:

- Open flame burning or torching.
- Sanding, grinding, planing, needle gunning, or blasting with power tools and equipment not equipped with a shroud and HEPA vacuum attachment.
- Using a heat gun at temperatures greater than 1100°F.

There is no way to eliminate dust, but some renovation methods make less dust than others. Contractors may choose to use various methods to minimize dust generation, including using water to mist areas before sanding or scraping; scoring paint before separating components; and prying and pulling apart components instead of breaking them.

3. Clean up thoroughly. The work area should be cleaned up daily to keep it as clean as possible. When all the work is done, the area must be cleaned up using special cleaning methods before taking down any plastic that isolates the work area from the rest of the home. The special cleaning methods should include:

- Using a HEPA vacuum to clean up dust and debris on all surfaces, followed by
- Wet wiping and wet mopping with plenty of rinse water.

When the final cleaning is done, look around. There should be no dust, paint chips, or debris in the work area. If you see any dust, paint chips, or debris, the area must be re-cleaned.

FOR PROPERTY OWNERS: AFTER THE WORK IS DONE

When all the work is finished, you will want to know if your home, child care facility, or school where children under six attend has been cleaned up properly.

EPA Requires Cleaning Verification.

In addition to using allowable work practices and working in a lead-safe manner, EPA's RRP rule requires contractors to follow a specific cleaning protocol. The protocol requires the contractor to use disposable cleaning cloths to wipe the floor and other surfaces of the work area and compare these cloths to an EPA-provided cleaning verification card to determine if the work area was adequately cleaned. EPA research has shown that following the use of lead-safe work practices with the cleaning verification protocol will effectively reduce lead-dust hazards.

Lead-Dust Testing.

EPA believes that if you use a certified and trained renovation contractor who follows the LRRP rule by using lead-safe work practices and the cleaning protocol after the job is finished, lead-dust hazards will be effectively reduced. If, however, you are interested in having lead-dust testing done at the completion of your job, outlined below is some helpful information.

What is a lead-dust test?

- Lead-dust tests are wipe samples sent to a laboratory for analysis. You will get a report specifying the levels of lead found after your specific job.

How and when should I ask my contractor about lead-dust testing?

- Contractors are not required by EPA to conduct lead-dust testing. However, if you want testing, EPA recommends testing be conducted by a lead professional. To locate a lead professional who will perform an evaluation near you, visit EPA's website at epa.gov/lead/pubs/locate or contact the National Lead Information Center at **1-800-424-LEAD (5323)**.
- If you decide that you want lead-dust testing, it is a good idea to specify in your contract, before the start of the job, that a lead-dust test is to be done for your job and who will do the testing, as well as whether re-cleaning will be required based on the results of the test.
- You may do the testing yourself. If you choose to do the testing, some EPA-recognized lead laboratories will send you a kit that allows you to collect samples and send them back to the laboratory for analysis. Contact the National Lead Information Center for lists of EPA-recognized testing laboratories.

FOR ADDITIONAL INFORMATION

You may need additional information on how to protect yourself and your children while a job is going on in your home, your building, or child care facility.

The National Lead Information Center at **1-800-424-LEAD (5323)** or epa.gov/lead/nlic can tell you how to contact your state, local, and/or tribal programs or get general information about lead poisoning prevention.

- State and tribal lead poisoning prevention or environmental protection programs can provide information about lead regulations and potential sources of financial aid for reducing lead hazards. If your state or local government has requirements more stringent than those described in this pamphlet, you must follow those requirements.
- Local building code officials can tell you the regulations that apply to the renovation work that you are planning.
- State, county, and local health departments can provide information about local programs, including assistance for lead-poisoned children and advice on ways to get your home checked for lead.

The National Lead Information Center can also provide a variety of resource materials, including the following guides to lead-safe work practices. Many of these materials are also available at epa.gov/lead/pubs/brochure

- Steps to Lead Safe Renovation, Repair and Painting.
- Protect Your Family from Lead in Your Home
- Lead in Your Home: A Parent's Reference Guide

For the hearing impaired, call the Federal Information Relay Service at 1-800-877-8339 to access any of the phone numbers in this brochure.

EPA CONTACTS

EPA Regional Offices

EPA addresses residential lead hazards through several different regulations. EPA requires training and certification for conducting abatement and renovations, education about hazards associated with renovations, disclosure about known lead paint and lead hazards in housing, and sets lead-paint hazard standards.

Your Regional EPA Office can provide further information regarding lead safety and lead protection programs at epa.gov/lead.

HUD Office of Healthy Homes and Lead Hazard Control

The Department of Housing and Urban Development (HUD) provides funds to state and local governments to develop cost-effective ways to reduce lead-based paint hazards in America's privately-owned low-income housing. In addition, the office enforces the rule on disclosure of known lead paint and lead hazards in housing, and HUD's lead safety regulations in HUD-assisted housing, provides public outreach and technical assistance, and conducts technical studies to help protect children and their families from health and safety hazards in the home. Contact the HUD Office of Healthy Homes and Lead Hazard Control for information on lead regulations, outreach efforts, and lead hazard control research and outreach grant programs.

SAMPLE PRE-RENOVATION FORM

This sample form may be used by renovation firms to document compliance with the Federal pre-renovation education and renovation, repair, and painting regulations.

Occupant Confirmation

Pamphlet Receipt

- I have received a copy of the lead hazard information pamphlet informing me of the potential risk of the lead hazard exposure from renovation activity to be performed in my dwelling unit. I received this pamphlet before the work began.

Printed Name of Owner-occupant

Signature of Owner-occupant

Signature Date

Renovator's Self Certification Option (for tenant-occupied dwellings only)

Instructions to Renovator: If the lead hazard information pamphlet was delivered but a tenant signature was not obtainable, you may check the appropriate box below.

- Declined** – I certify that I have made a good faith effort to deliver the lead hazard information pamphlet to the rental dwelling unit listed below at the date and time indicated and that the occupant declined to sign the confirmation of receipt. I further certify that I have left a copy of the pamphlet at the unit with the occupant.
- Unavailable for signature** – I certify that I have made a good faith effort to deliver the lead hazard information pamphlet to the rental dwelling unit listed below and that the occupant was unavailable to sign the confirmation of receipt. I further certify that I have left a copy of the pamphlet at the unit by sliding it under the door or by (fill in how pamphlet was left).

Printed Name of Person Certifying Delivery

Attempted Delivery Date

Signature of Person Certifying Lead Pamphlet Delivery

Unit Address

Note Regarding Mailing Option — As an alternative to delivery in person, you may mail the lead hazard information pamphlet to the owner and/or tenant. Pamphlet must be mailed at least seven days before renovation. Mailing must be documented by a certificate of mailing from the post office.
