EQUIPMENT

There are hundreds of bags, buckets, pouches and holsters out there, but your standard five-gallon pail ain't gonna cut it up there. Portable containers that are hoisted and stationary containers that are carried must be rated.

STATIC TESTING Portable and stationary containers should be statically pulled or loaded.

INVERTED STATIC TESTING Containers designed to carry contents that cannot be tethered should have a top or closure that is tested upside down.

DYNAMIC TESTING Containers should have drop testing done on attachment points meant to anchor tool lanyards.
