1 What would you identify as the critical issue for the future?

2 If things went well, being optimistic but realistic, talk about what you would see as a desirable project/policy/organisational outcome?

3 If the project/policy/strategy went wrong, what factors would you worry about?

4 Looking at internal systems, how might these need to be changed to help bring about the desired outcome?

5 Looking back, what would you identify as the significant events which have produced the current situation?

6 Looking forward, what do you see as priority actions which should be carried out soon?

7 If all constraints were removed and you could direct what is done, what more would you wish the department/project/org would do?
