

# The problem

What is the current problem?  
What is the job to be done?  
What are learning barriers?

# Learning objectives

# Instructional strategy

How are we going to reach the learner? Didactic, technology, rooms, experiences? How will the learning be transferred?  
How do we make it social?

Activities

Process

# The Learner

Why do they need to learn?  
What are their needs, hopes, wants, fears?

# Learning support

What support do we put in place (coaching, peer support, mentoring, help)?  
What materials do we leave behind?  
What other support do we signpost?

# Success criteria and evaluation

How do we know it worked? What changes can we observe? How do we measure success?
