

## Pacific Internet Governance Forum 2025

The virtual and hybrid Pacific Internet Governance is organized by the Pacific Chapter of the Internet Society (PICISOC) in partnership with various key stakeholders. It focuses on local issues and Internet Governance developments in the Pacific islands region and seeks to provide impartial advice to governments and the public on Internet-related matters that are relevant to Pacific Island people. The Pacific Internet Governance forum will ensure a human-centric design thinking process to create new and innovative ideas to deal with the challenges faced by our members in the Pacific.
