Frost Delay Procedure

Frost delays are necessary to protect the long term health and playability of our course, especially the greens surfaces. Monitored daily and the ultimate decision of the Superintendent and communicated through the website and golf shop staff.

In order to protect the turf and allow maximum access when conditions allow, below is an outline of the Frost Delay Procedure on days where low temperatures and daylight time require a delay.

With the departure of Daylight Savings, mid to late November, December & January sunrise happens much later (8:30 AM – 9:00 AM), due to that the tee sheet will start at the following times:

- November 1st- 9:00 AM
 - November 15th- 9:30 AM
 - December & January- 10:00 AM
 - February 1st- 9:30 AM
 - February 15th- 9:00 AM
- Superintendent to assess course conditions at dawn each morning
 - Home page of the website will be updated with course conditions
 - Email will be sent to the days tee sheet with updated course conditions

If a frost delay is needed and it is determined that the course can open at 11:30 AM Shotgun will be offered to all players upon opening of the golf shop.

If further inspection/progress is needed to make a decision on allowing access the next update will come via same channels (website and email) by 10:00 AM – 10:30 AM

The final decision for the day will be made during that timeframe with the following options.

- 1) Facilitate an 11:30am shotgun
- 2) Remain closed for the day

**** Golf shop will do its best to facilitate golfers arriving outside of these times but access can not be guaranteed. If you intend to golf outside of the posted daily decision please call golf shop before****
