WORK

A yellow construction vehicle, possibly a bulldozer, is shown in a close-up, low-angle shot. The vehicle's large, treaded tire is prominent in the foreground. A person's hand, wearing a dark jacket, is visible on the right side, pointing towards the vehicle. The background is slightly blurred, showing more of the vehicle and some greenery.

FR WORKWEAR FABRIC GUIDE

DURALIGHT STRETCH DENIM

Treated cotton and inherently flame-resistant fibers combine to create our lightest weight FR denim. It is 25% more breathable and 35% faster drying than 100% cotton denim of similar weight and the fabric features stretch, odor-control, and superior moisture wicking properties.

DURALIGHT STRETCH CANVAS

This midweight canvas layer features Cordura® nylon fibers that produce a fabric three times more durable than 100% cotton canvas of a similar weight. Elastane fibers are woven into the abrasion resistant fabric to yield a comfortable stretch while you work.

STRETCH DENIM

Our exclusive 13-ounce stretch denim is constructed in a technique called "ring spun" which gives the material its iconic look and durable reputation. Intricate washes and finishing details create the specialty product that Ariat® FR denim is known for.

FR WORKWEAR FABRIC GUIDE

PRIMO FLEECE

This top-of-the-line fleece features inherently flame-resistant fibers, water-repellency, and superior wind resistance and stretch. Because the fabric is inherently flame-resistant, the fleece is exceptionally warm and breathable without added weight.

STRETCH PIMA COTTON JERSEY

The ultimate in wearability, this jersey is composed of an extra-long staple cotton called “pima” that produces a silky, luxuriously soft fabric that is notably strong and resistant to wear and tear. Moisture Movement Technology™ helps reduce heat stress in the field.

FR AIR INHERENT (DH AIR)

Superior flame-resistance that won't weigh you down. Unlike treated FR fabrics, DH Air has inherent flame-resistant fibers woven right into the fabrication. It also has an ultralight feel and high breathability for greater comfort without sacrificing protection.

FR WORKWEAR FAQ

1. Who is Ariat® Flame-resistant (FR) Workwear designed for?

Ariat® FR Workwear is designed for electricians and workers in the utility, oil, gas and petrochemical fields who are at risk of exposure of electric arc flashes and flash fires, which could cause severe or fatal burn injuries. Typical candidates for FR workwear include electric linemen, pipeline and refinery workers, as well as industrial electricians.

2. How does Ariat® FR Workwear help protect against burn injury?

Through the use of flame-resistant chemicals or fabric blends, Ariat® FR Workwear is designed to self-extinguish within seconds after the source of ignition is removed, which may permit the wearer to react to an accidental exposure. It is not designed to be flame proof; it is flame-resistant.

3. Can the flame-resistant chemicals be washed out?

Provided you follow garment care instructions for Ariat® FR Workwear, reasonable laundering should not affect the flame-resistant properties of the fabric.

4. How can Ariat® FR Workwear be distinguished from traditional Ariat Workwear?

Ariat® FR Workwear is clearly identified with “Ariat FR” labels on the middle of sleeves, back necks, or on the coin pocket of denim. Product hang tags and CAT labels also help distinguish Ariat flame-resistant products.

5. What is a CAT?

A CAT is a rating for FR workwear that indicates the level of protection the garment provides. There are five CATs ranging from 0-4, with a CAT of 0 representing the least protection, and a CAT of 4 representing the most protection. The NFPA 70E consensus standard assigns these categories based on the electrical maintenance that is to be performed, and each CAT correlates to a specific range of ATPVs. For example, CAT 1 would include ATPVs equal to or greater than 4 cal/cm² but less than 8 cal/cm².

6. What is an Arc Rating?

An Arc Rating is a rating assigned to flame-resistant workwear indicating the level of protection provided. Higher-weight fabrics typically have a higher Arc Rating and provide increased protection (as does the layering of FR workwear). All Ariat® FR Workwear has the Arc Rating marked on the hang tag for easy reference.

7. Can I repair my FR workwear?

No. If you have a rip or other damage to your FR workwear, you must not use it.

8. Can I use DEET on flame-resistant workwear?

No. DEET is one of the most effective mosquito repellents on the market, but it should only be used on the skin, never on FR workwear. For the most effective mosquito and tick protection, use DEET based repellents on skin (especially on exposed skin) and use a permethrin (the active ingredient in most lice shampoos) product washed into or applied to flame-resistant workwear. These products do not add any appreciable flammability to FR workwear and therefore do not affect its flame-resistant properties. When using permethrin in a spray form, use the WATER-BASED formulas only. Propellants are almost always flammable in this application, so the powder form washed into the workwear or the WATER-BASED spray formulas is recommended.

9. Is FR workwear built for welding safety?

No, FR workwear is not designed or certified to protect against molten metal or other hazards present when welding.

FR WORKWEAR CARE INSTRUCTIONS

WARNING: Failure to launder garment properly can result in loss of flame-resistance properties.

- Ariat does not recommend dry cleaning FR garments. In some cases dry cleaning chemical residue left on the fabric could burn.
- Due to the various care instructions of different fabrics and styles we recommend following the care instructions listed inside each individual garment.
- Flame-resistant workwear should be laundered separately from the family wash to prevent cross contamination.
- Washing new garments before wearing is recommended. Wash new garments separately from other garments.
- Turn garment inside out before washing for best results.
- Machine wash using typical home laundry detergent.
- Liquid detergents or other products containing hydrogen peroxide should not be used.
- Avoid starch, fabric softener or any other laundry additives such as soil release or antistatics.
- Bleach must never be used on FR fabrics.
- Chlorine bleach (sodium hypochlorite) and oxygen bleach (hydrogen peroxide), either alone or in combination with other chemistry must never be used.
