Informed Consent for Treatment

I understand that Acupuncture practice is a comprehensive system of health care using Oriental medical theory and its unique methods of diagnosis and treatment. Its treatment techniques include the insertion of acupuncture needles through the skin and the use of other methods of acupuncture point stimulation, including the use of heat, Oriental massage, and electrical stimulation. Additionally, herbal supplemental therapies, dietary guidelines, breathing techniques and exercise based on Oriental Medical principles may also be used. Oriental Medicine is a healing art that perceives the circulation and balance of energy in the body as being fundamental to the wellbeing of the individual. It implements the theory through specialized methods of analyzing the energy status of the body and treating the body with acupuncture and other related modalities for the purpose of strengthening the body, improving physiological function and reducing pain.

I understand that acupuncturist do not make Western medical (biomedical) diagnosis and that it is my responsibility to seek such diagnosis elsewhere if I have not already done so.

I understand that there may be some conditions that require a referral to a licensed healthcare provider for the safety of my health, and I will cooperate if such referral is needed. The following conditions will require a referral to a licensed healthcare provider: uncontrolled hypertension; acute, severe abdominal pain; acute, undiagnosed neurological changes; unexplained weight loss or gain in excess of 15% of the body weight in less than a three-month period; suspected fracture or dislocation; suspected systemic infection; any serious undiagnosed hemorrhagic disorder; and acute respiratory distress without a previous history.

I hereby authorize Bonnie Bolash, Master of Acupuncture, Licensed Acupuncturist by the Board of Medical Practice license number 1176, to perform, diagnosis and treat according to the professional standards of Oriental medicine and professional judgment. This authority shall extend to remedying any unforeseen conditions or reactions to treatment procedures. I understand that there are possible unforeseen risks to the performance of the procedures of Oriental medicine. I have been informed that possible side effects of acupuncture treatment are rare and may include, but are not limited to, bruising, bleeding, skin irritation, mild pain in the treated area, muscle weakness and soreness; brief generalized fatigue or nausea; temporary worsening of some symptoms; risk of infection; needle sickness; or broken needles. Herbal remedies may have side effects including, but not limited to gastrointestinal disturbances. Moxibustion can cause burns. Massage can cause increased muscle soreness, spasms, bruising, and generalized fatigue or nausea and temporary worsening of some symptoms. Electro acupuncture may cause electrical shock, pain or discomfort, and the possible aggravation of symptoms existing prior to treatment. Cupping therapy may cause circular bruising.

I understand that no promises or guarantees can be made regarding the outcome of treatment and that reasonable efforts will be made to give me information so that I may make an educated decision regarding the duration and appropriateness of continuing care and that I may refuse any therapy at any time. All of my questions have been answered to my satisfaction.
