

CURIO ANYWHERE

For Content Creation

FIND EVERYTHING IN YOUR ARCHIVE

SAVE TIME

54% of U.S. office professionals report wasting time searching for much-needed files in cluttered online filing systems. Curio makes everything searchable by what's in it. Find anything instantly across millions of assets.

MACHINE LEARNING AT SCALE

Speech to text, image recognition, face recognition, OCR, logo detection, & more.

TRAIN THE ML WITH YOUR CONTENT

Make your search even more powerful by using your content within Curio to tune and train the ML models.

BRING YOUR MAM | DAM

Curio has world class API & metadata export capabilities so you can super-charge whatever MAM, DAM, NLE, or BI solution you're using.

CREATE NEW CONTENT

Creatives need to tell compelling stories. What they don't need to do, is laboriously watch every second, of every title or asset that they're trying to find moments in for new content. Curio gives you immediate access to every moment, so your producers & editors can spend their time creating.
