# Introduction

## **About me**

Brenda is a residential interior designer with a passion for creating beautiful, functional spaces that reflect her clients' unique styles and needs. After graduating from the University of Alberta, she spent many years as a stay-at-home mom to her four children. It was during this time that she rediscovered her love for design and decided to turn her passion into a career.

With a keen eye for detail and a talent for blending various design elements, Brenda specializes in staging, decorating, and designing custom pieces using creative tools like SketchUp software to render and produce drawings. She believes that everyone deserves to love the space they live in, and her goal is to transform homes into serene sanctuaries where her clients can feel calm and at peace.

When she's not designing, Brenda enjoys a variety of hobbies and activities with her family. She loves raising chickens and tending to her small farm, and she and her husband share a passion for car racing. Travel is also a big part of her life, and she draws inspiration from the different cultures and design styles she encounters on her adventures.
