

Air Component Solutions

AC Floor Bracket

Key Features:

1. Using 2mm galvanized steel plate.
2. The porous design can adjust the height according to the space.
3. Adopting combination bolt connection for easier assembly and less deformation of the bracket.
4. Up to 300 kilograms, equivalent to the weight of four adults.
5. Adopting shockproof rubber feet for strong shock absorption.
6. The shockproof foot base plate can be installed in multiple directions according to the size of the occupied area
