NOTE: Flood risks in New Jersey are growing due to the effects of climate change. Coastal and inland areas may experience significant flooding now and in the near future, including in places that were not previously known to flood. For example, by 2050, it is likely that sea-level rise will meet or exceed 2.1 feet above 2000 levels, placing over 40,000 New Jersey properties at risk of permanent coastal flooding. In addition, precipitation intensity in New Jersey is increasing

at levels significantly above historic trends, placing inland properties at greater risk of flash flooding. These and other coastal and inland flood risks are expected to increase within the life of a typical mortgage originated in or after 2020. To learn more about these impacts, including the flood risk to your property, visit njreal.to/flood-disclosure. To learn more about how to prepare for a flood emergency, visit njreal.to/flood-planning.

FLOOD INSURANCE: Flood insurance may be available to renters through FEMA's National Flood Insurance Program to cover your personal property and contents in the event of a flood. A standard renter's insurance policy does not typically cover flood damage. You are encouraged to examine your policy to determine whether you are covered.
