CHANGE IS IN THE AIR

Ever since our company started selling the BC Roasters we have made it our goal to constantly improve and innovate our products. In doing such we determined that every year we would make improvements and updates to better serve our clients growing needs. Therefore to better keep track of the model roaster our clients own we were the first company to make & sell roasters with a model year. Each year we update our products based on our clients suggestions as well as ways to make them easier to use and maintain. Some years models received small updates while other years we made many updates. In 2023 our larger roasters received the most innovations. But we also have some nice updates to the BC-1, 3.5 & 5 models. We will try to show you a few of the updates in this 2023 BC LINEUP brochure.
